| By Whon? Michael Barrett Was a Watercourse Reached? Yes No If a Watercourse was Impacted, Describe Fully. N/A Describe Cause of Problem and Remedial Action Taken. Injection line leak, line was isolated and taken out of service. Describe Area Affected and Cleanup Action Taken. Talon/LPE (Talon) was contracted to conduct remedial actions. Talon conducted soil sampling, and subsequently excavated the impacted area to a depth of 8-feet below ground surface. All of the contaminated soil was transported to NMOCD approved disposal facility Lea Land, LLC. Talon personnel collected confirmation soil sampling and subsequently excavated the impacted area to a depth of 8-feet below ground surface. All of the contaminated soil was transported to NMOCD approved disposal facility Lea Land, LLC. Talon personnel collected confirmation soil samples and backfilled the excavation to a depth of 5-feet below ground surface. A 20 Mil liner was place in the excavation was backfilled to grade. All backfill material was top soil from the same area as the release. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of reportator of liability should their operations are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment.
