NATURE OF RELEASE

Type of Release	Natural Gas and crude oil	Volume of Release	17 mcf natural gas and 12 bbls crude oil	Volume Recovered	NONE
Source of Release	12" Natural Gas Pipeline	Date and Hour of Occurrence	Unknown	Date and Hour of Discovery	3/1/08 Time: 8:00 a.m.
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?		Date and Hour:			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken:

A 12" Natural gas pipeline operating at approximately 15 p.s.i. developed a leak, a repair crew excavated the leak area and installed a temporary repair clamp on 3/1/08. The line was permanently repaired on 3/20/08 by inserting approximately 500 ft. of 8" poly-pipe inside the existing 12" steel line.

Describe Area Affected and Cleanup Action Taken. The leak site was discovered by Tony Savoie on 6/4/08 an ESA was performed and a remediation plan was prepared. Approximately 1,580 Sq. ft. of pasture was affected by the release and repair activities. All remediation activities will follow the NMOCD guidelines.

Between June 10, and June 25, 2010, Basin Environmental remediated the Woolworth 12" Release Site. Confirmation soil samples were collected from the excavation floor and sidewalls prior to backfilling. Beginning June 19, 2008, the excavation was backfilled with treated material from SUG's Landfarm.

Please see the attached Basin Environmental Services Technologies Remediation Summary and Site Closure Request for details of remedial activities and laboratory analytical results from confirmation soil sampling.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
