NATURE OF RELEASE

Type of Release: Crude Oil and Natural Gas	Volume of Release: 36 bbls Crude Oil and 50 mcf Natural Gas	Volume Recovered: None
Source of Release: 4" Natural Gas Pipeline	Date and Hour of Occurrence: Unknown	Date and Hour of Discovery: 08/26/2008 9:10 a.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Buddy Hill NMOCD	
By Whom?	Date and Hour: 08/26/2008 9:12 a.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A 4" Natural gas pipeline leaked releasing natural gas and crude oil. The line was blocked in and blown down. Permanent repairs will be made by replacing approximately 500 ft. Of 4" steel line with 4" Poly pipe.

Describe Area Affected and Cleanup Action Taken.*

The area affected measured approximately one hundred sixty (160) feet in length and varied from approximately thirty five (35) feet to sixty (60) feet in width, and was approximately nineteen (19) feet in depth. The impacted soil was removed, stockpiled onsite and remediated by mixing and blending methods. Confirmation samples were collected from the excavation floor, side walls and stockpiles. The samples were sent to an NMOCD approved laboratory, which determined concentrations of BTEX and TPH were within the regulatory standards. The NMOCD granted verbal approval to leave elevated chloride concentrations in-situ and remediate at the time of abandonment. The site was backfilled with the remediated stockpiles and the surface was restored.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
