Mr. Mike Bratcher  
Environmental Engineer Specialist  
Oil Conservation Division, District 2  
811 S. First Street  
Artesia, New Mexico 88210

**Re: Closure Report for the Cimarex Energy, Amoco Federal #3, Section 27,  
Township 26 South, Range 29 East, Eddy County, New Mexico.**

Mr. Bratcher:

Tetra Tech, Inc. (Tetra Tech) was contacted by Cimarex Energy (Cimarex) to assess releases that occurred at the Amoco Federal #3, located in Section 27, Township 26 South, Range 29 East, Eddy County, New Mexico (Site). The spill site coordinates are N 32.01194°, W 103.96888°. The site location is shown on Figures 1 and 2.

### Background

According to the State of New Mexico C-141's Initial Reports, two illegal dumps were discovered on June 10, 2013 and June 30, 2013, and both released approximately one hundred and twenty plus (120+) barrels of produced water from a vacuum truck. None of the released fluids were recovered. All of the fluids remained on the well pad. The first spill affected an area of approximately 60' x 40' and 20' x 80'. After the first spill was remediated, a second release occurred in an area measuring approximately 60' x 50' and 20 x 50' on the pad and overlapped a portion of the first spill. The initial C-141's forms are enclosed in Appendix A.

### Groundwater

The New Mexico State Engineer's Office database and USGS database did not show any wells in Section 27, however, the USGS database showed a wells in Section 5 with reported depths to water of 75' and 78' below ground surface (bgs). In addition, it appears the majority of the shallow groundwater may be limited to the alluvial sand and gravel deposits in the vicinity of the Pecos River Draw. A topographical map showing the groundwater elevations, The New Mexico State Engineer, and USGS water well reports are shown in Appendix B.

TETRA TECH

## Regulatory

A risk-based evaluation was performed for the Site in accordance with the NMOCD Guidelines for Remediation of Leaks, Spills and Releases, dated August 13, 1993. The guidelines require a risk-based evaluation of the site to determine recommended remedial action levels (RRAL) for benzene, toluene, ethylbenzene and xylene (collectively referred to as BTEX) and total petroleum hydrocarbons (TPH) in soil. The proposed RRAL for benzene was determined to be 10 parts per million (ppm) or milligrams per kilogram (mg/kg) and 50 ppm for total BTEX (sum of benzene, toluene, ethylbenzene, and xylene). Based upon the depth to groundwater, the proposed RRAL for TPH is 1,000 mg/kg.

## Spill Assessment and Remediation

### 1<sup>st</sup> Spill

Prior excavating the spill area, Tetra Tech installed four (4) trenches (T-1, T-2, T-3 and T-4) using a backhoe to assess impacted soils on June 17, 2013. Selected samples were analyzed for chlorides using a field titration kit. Based on the field results, the area was excavated to the appropriate depths. The trench samples were analyzed for chloride by EPA method 300.0. Copies of laboratory analysis and chain-of-custody documentation are included in Appendix C. The sampling results summarized in Table 1. The trench locations are shown on Figure 3 of Spill 1.

Referring to Table 1, all trench samples (T-1, T-2, T-3, and T-4) had elevated chloride levels at 2' below surface with chloride readings ranging from 7,170 kg/mg to 17,800 mg/kg. The chloride levels declined with depth and at approximately 4' below surface the highest chloride level in the trenches of 540 mg/kg.

### Remediation and Sampling

On June 17, 2013 Tetra Tech supervised the removal of the impacted materials as highlighted (green) in Table 1 and shown on Spill 1 Figure 4. The areas of CS-1, CS-2, and CS-3 were excavated to a depth of approximately 3.0' below surface. The area of CS-4 was excavated to a depth of 4.0' below surface.

Once the spill area was excavated, Tetra Tech collected confirmation samples from the excavation bottoms and sidewalls and analyzed for TPH analysis by EPA method 8015 modified, BTEX by EPA Method 8021B and chloride by EPA method 300.0. Confirmation samples are summarized in Table 1.

Referring to Table 1, chloride concentrations were detected in the area of T-2 (north wall and east wall) with concentrations of 2,550 mg/kg and 3,070 mg/kg, respectively. The north wall was excavated near a closed reserve pit and the concentration appear be influenced by the reserve pit. In addition, the east wall could not be excavated safely due to the close proximity of the well.

TETRA TECH

The excavated areas were backfilled with clean material to grade and approximately 460 cubic yards were hauled to proper disposal.

## 2<sup>nd</sup> Spill

### Remediation and Sampling

On June 31, 2013, Tetra Tech was contacted to remediate a second release (Spill 2) on the pad. Tetra Tech supervised the removal of the impacted materials as highlighted (green) in Table 2 and shown on Figure 2 (Spill 2). The excavation depth ranged from 2' to 4' below surface. The area of CS-3 was excavated to approximately 2.0' below surface. The areas of CS-1 and CS-5 were excavated to a depth of approximately 3.0' below surface. The areas of CS-2 and CS-4 were excavated to a depth of approximately 4.0' below surface.

Once excavated, Tetra Tech collected confirmation samples for the excavation bottoms and sidewalls for TPH analysis by EPA method 8015 modified, BTEX by EPA Method 8021B and chloride by EPA method 300.0. Copies-of-laboratory analysis and chain-of-custody documentation are included in Appendix C. The results of the sampling are summarized in Table 2. The sampling locations are shown on Figure 3 (Spill 2).

Based on the field data, a backhoe trench (T-1) was installed in the area of CS-4 to define the chloride extents. Confirmation samples were sent to the lab to be analyzed for chlorides by EPA method 300.0.

Referring to Table 2, none of the samples exceeded the RRAL for TPH or BTEX. In the sidewall areas of CS-3 and CS-4, the area showed chloride concentrations of 1,720 mg/kg and 3,130 mg/kg, respectively. These areas could not be excavated safely due to the close proximity of the well. The remaining chlorides concentrations do not appear to be an environmental concern.

In addition, the T-1 samples did show declining chloride concentrations with depth. However, a chloride spike was detected at 10' of 1,120 mg/kg and rapidly declined to 311 mg/kg at 12' below surface. The chloride concentration at 8' below surface above the chloride spike was 129 mg/kg, therefore it was determined that the 10' sample may have been cross-contaminated from the upper soils.

Based on the results, the excavated areas were backfilled with clean material to grade and approximately 920 cubic yards were hauled to proper disposal.

TETRA TECH

### Conclusions

Based on the remediation activities performed at this location, Cimarex requests closure for this site. The C-141 (Final) is included in Appendix A. If you have any questions or comments concerning the assessment or the remediation activities for this site, please call me at (432) 682-4559.

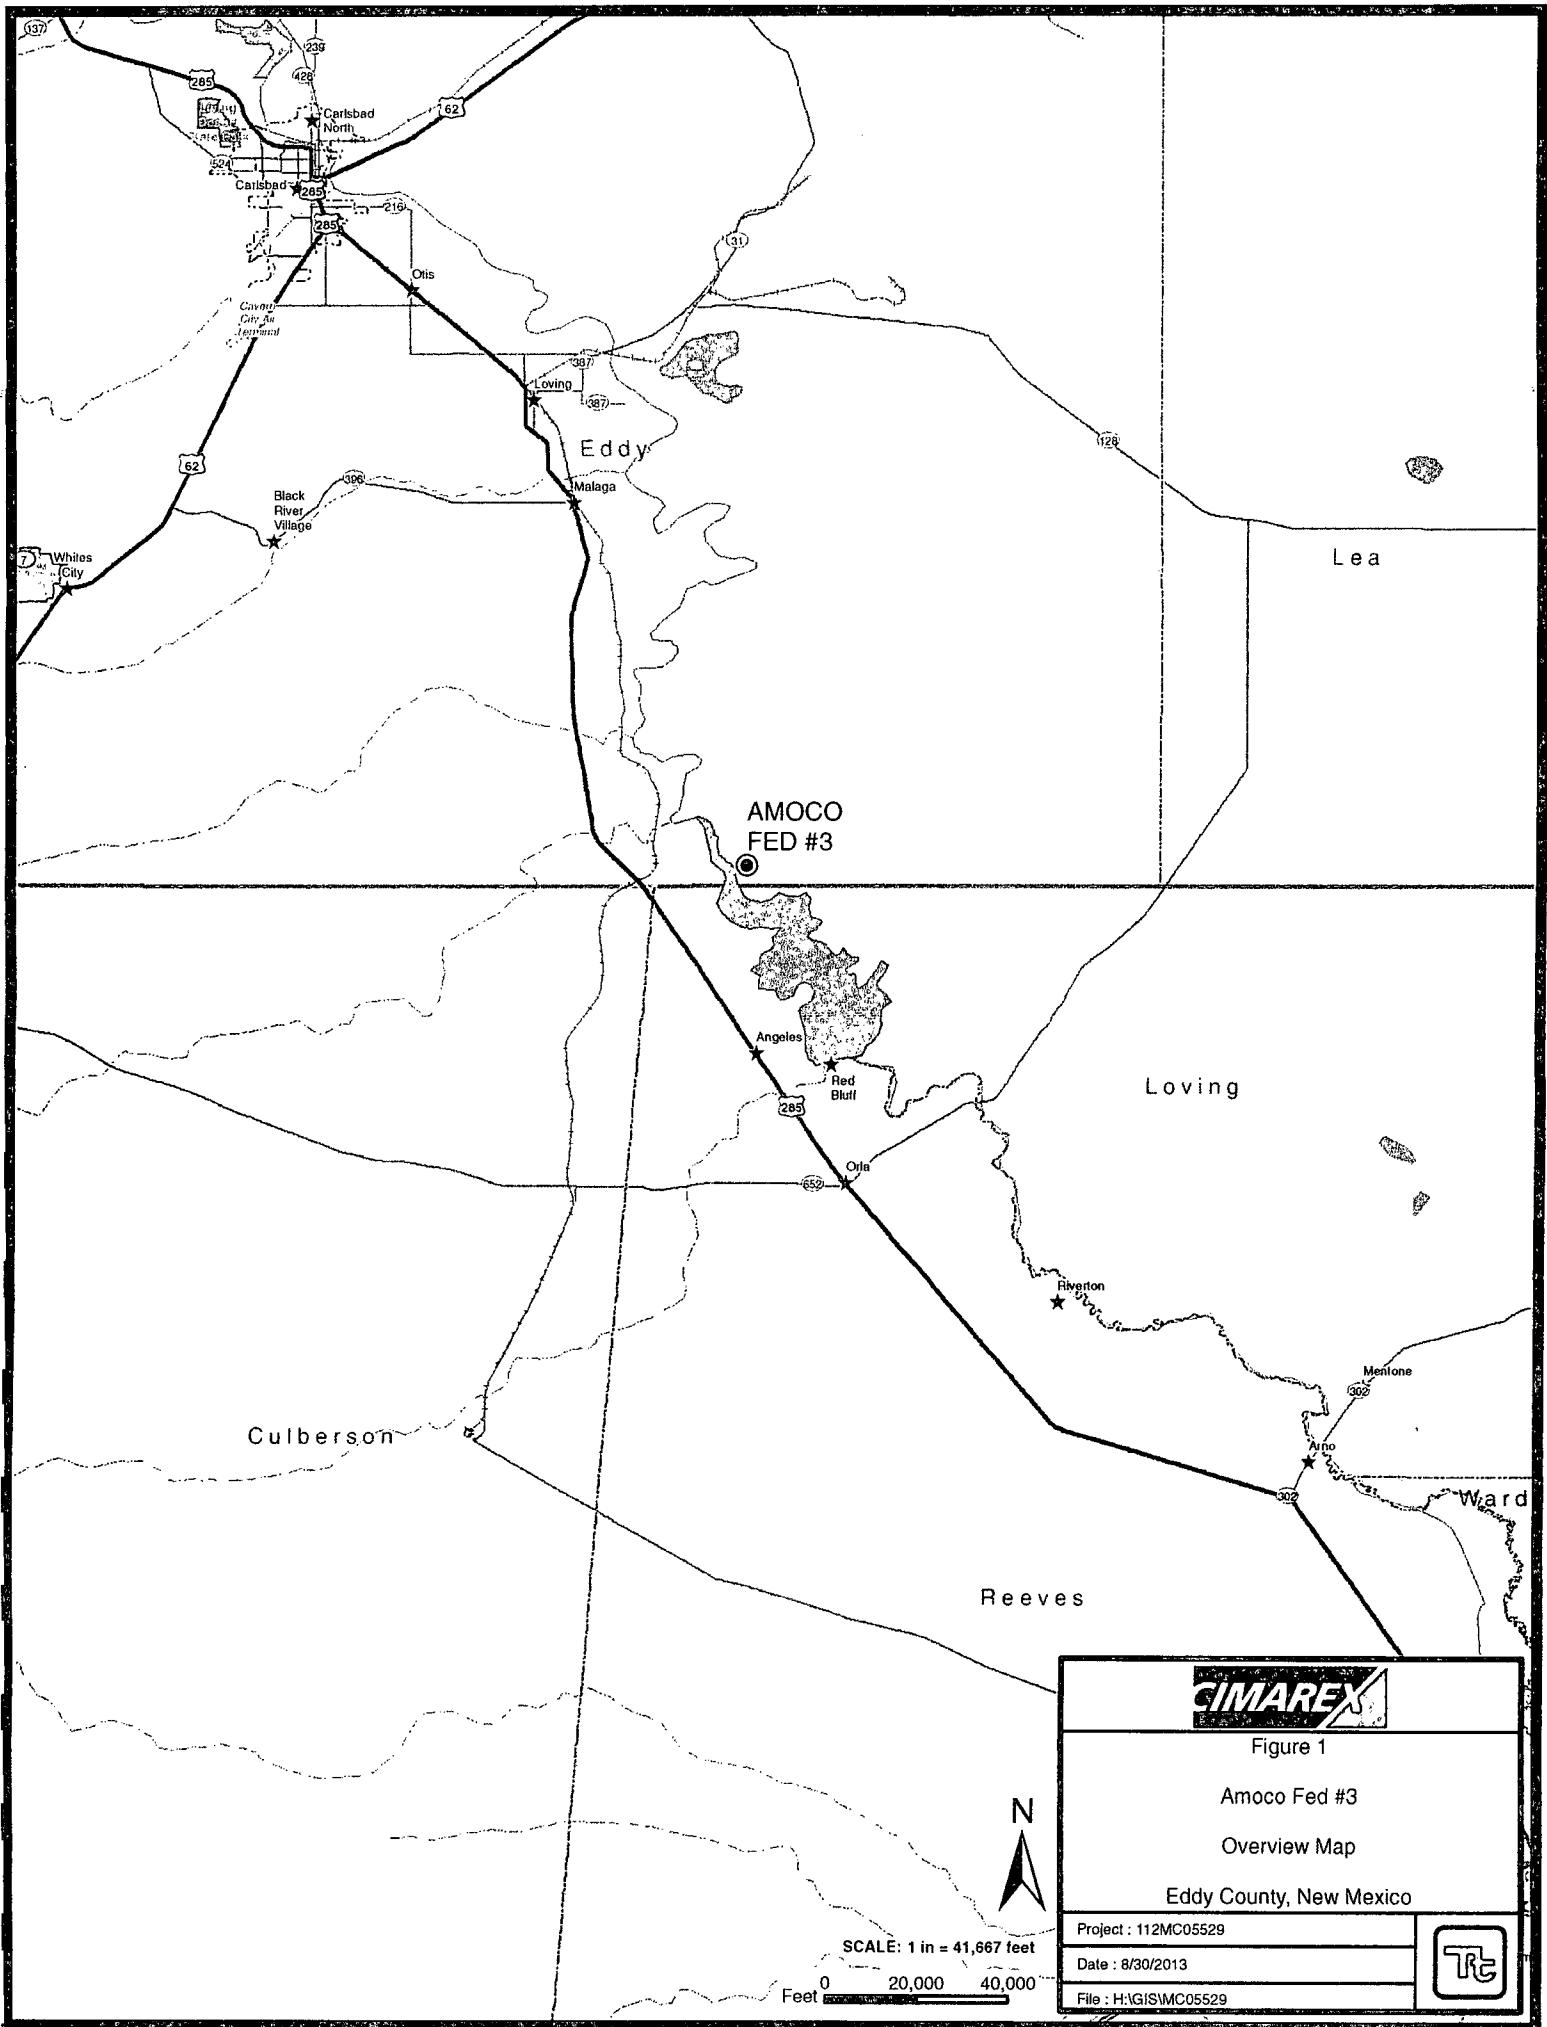

Respectfully submitted,  
TETRA TECH

## Release Notification and Corrective Action

### OPERATOR

Initial Report

Final Report

Name of Company	Cimarex Energy	Contact	Terry D. Ainsworth
Address	600 Marienfeld Midland, TX 79701	Telephone No.	(575) 390-1388
Facility Name	Amoco Fed #3	Facility Type	Pumping well

Surface Owner	Ross Ranch	Mineral Owner	Lease No.
---------------	------------	---------------	-----------

### LOCATION OF RELEASE

Unit Letter	Section 27	Township 26S	Range 29E	Feet from the	North/South Line	Feet from the	East/West Line	County Eddy

Latitude 32 00' 43" Longitude 103 58' 08"

### NATURE OF RELEASE

Type of Release	Produce water	Volume of Release	120+	Volume Recovered	0
Source of Release	looks like a vacuum truck put its load on the ground here AGAIN	Date and Hour of Occurrence		Date and Hour of Discovery	
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
		BLM			
By Whom?		Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			
If a Watercourse was Impacted, Describe Fully.*					

Describe Cause of Problem and Remedial Action Taken.*

Describe Area Affected and Cleanup Action Taken.*
We will dig it up until the ground is not contaminated – haul contaminated soil to Lea Land LLC

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Tetra Tech excavated site and collected confirmation samples to define spills extent. Soil that exceeded RRAL was removed and hauled away for proper disposal at Lea Land LLC. Site was then brought up to surface grade with clean backfill material. Tetra Tech prepared closure report and submitted to NMOCD for review.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. ## Case Narrative

Samples for project Cimarex/Amoco Fed. #3 were received by TraceAnalysis, Inc. on 2013-06-25 and assigned to work order 13062540. Samples for work order 13062540 were received intact at a temperature of 3.6 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (Titration)	SM 4500-Cl B	86906	2013-06-25 at 13:37	102688	2013-06-28 at 13:49
Chloride (Titration)	SM 4500-Cl B	86906	2013-06-25 at 13:37	102724	2013-07-01 at 13:26
Chloride (Titration)	SM 4500-Cl B	86906	2013-06-25 at 13:37	102725	2013-07-01 at 13:26

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 13062540 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

## Appendix

### Report Definitions

Name	Definition
MDL	Method Detection Limit
MQL	Minimum Quantitation Limit
SDL	Sample Detection Limit

### Laboratory Certifications

C	Certifying Authority	Certification Number	Laboratory Location
-	NCTRCA	WFWB384444Y0909	TraceAnalysis
-	DBE	VN 20657	TraceAnalysis
-	HUB	1752439743100-86536	TraceAnalysis
-	WBE	237019	TraceAnalysis

### Standard Flags

F	Description
B	Analyte detected in the corresponding method blank above the method detection limit
H	Analyzed out of hold time
J	Estimated concentration
Jb	The analyte is positively identified and the value is approximated between the SDL and MQL. Sample contains less than ten times the concentration found in the method blank. The result should be considered non-detect to the SDL.
Je	Estimated concentration exceeding calibration range.
MI1	Split peak or shoulder peak
MI2	Instrument software did not integrate
MI3	Instrument software misidentified the peak
MI4	Instrument software integrated improperly
MI5	Baseline correction
Qc	Calibration check outside of laboratory limits.
Qr	RPD outside of laboratory limits
Qs	Spike recovery outside of laboratory limits.
Qsr	Surrogate recovery outside of laboratory limits.
U	The analyte is not detected above the SDL

## Case Narrative

Samples for project Cimarex/Amoco Fed. #3 were received by TraceAnalysis, Inc. on 2013-06-25 and assigned to work order 13062538. Samples for work order 13062538 were received intact at a temperature of 3.6 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
BTEX	S 8021B	87043	2013-07-01 at 10:00	102748	2013-07-01 at 14:30
Chloride (Titration)	SM 4500-Cl B	86906	2013-06-25 at 13:37	102687	2013-06-28 at 13:47
Chloride (Titration)	SM 4500-Cl B	86906	2013-06-25 at 13:37	102688	2013-06-28 at 13:49
TPH DRO - NEW	S 8015 D	87074	2013-07-01 at 13:00	102788	2013-07-02 at 17:32
TPH GRO	S 8015 D	87040	2013-07-01 at 10:00	102744	2013-07-01 at 14:30

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 13062538 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

## Appendix

### Report Definitions

Name	Definition
MDL	Method Detection Limit
MQL	Minimum Quantitation Limit
SDL	Sample Detection Limit

### Laboratory Certifications

C	Certifying Authority	Certification Number	Laboratory Location
-	NCTRCA	WFWB384444Y0909	TraceAnalysis
-	DBE	VN 20657	TraceAnalysis
-	HUB	1752439743100-86536	TraceAnalysis
-	WBE	237019	TraceAnalysis
1	NELAP	T104704392-12-4	Midland

### Standard Flags

F	Description
B	Analyte detected in the corresponding method blank above the method detection limit
H	Analyzed out of hold time
J	Estimated concentration
Jb	The analyte is positively identified and the value is approximated between the SDL and MQL. Sample contains less than ten times the concentration found in the method blank. The result should be considered non-detect to the SDL.
Je	Estimated concentration exceeding calibration range.
MI1	Split peak or shoulder peak
MI2	Instrument software did not integrate
MI3	Instrument software misidentified the peak
MI4	Instrument software integrated improperly
MI5	Baseline correction
Qc	Calibration check outside of laboratory limits.
Qr	RPD outside of laboratory limits
Qs	Spike recovery outside of laboratory limits.
Qsr	Surrogate recovery outside of laboratory limits.
U	The analyte is not detected above the SDL

# Case Narrative

Samples for project Cimarex/Amoco Fed. #3 were received by TraceAnalysis, Inc. on 2013-08-12 and assigned to work order 13081222. Samples for work order 13081222 were received intact at a temperature of 4.6 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
BTEX	S 8021B	88128	2013-08-13 at 06:00	104010	2013-08-14 at 10:58
Chloride (Titration)	SM 4500-Cl B	88138	2013-08-14 at 13:41	104082	2013-08-15 at 16:10
Chloride (Titration)	SM 4500-Cl B	88138	2013-08-14 at 13:41	104083	2013-08-15 at 16:11
Chloride (Titration)	SM 4500-Cl B	88138	2013-08-14 at 13:41	104084	2013-08-15 at 16:12
TPH DRO - NEW	S 8015 D	88125	2013-08-13 at 14:00	104004	2013-08-14 at 09:33
TPH GRO	S 8015 D	88170	2013-08-13 at 06:00	104057	2013-08-14 at 08:00
TPH GRO	S 8015 D	88187	2013-08-14 at 07:30	104077	2013-08-14 at 14:29

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 13081222 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

## Appendix

### Report Definitions

Name	Definition
MDL	Method Detection Limit
MQL	Minimum Quantitation Limit
SDL	Sample Detection Limit

### Laboratory Certifications

C	Certifying Authority	Certification Number	Laboratory Location
-	NCTRCA	WFWB384444Y0909	TraccAnalysis
-	DBE	VN 20657	TraceAnalysis
-	HUB	1752439743100-86536	TraceAnalysis
-	WBE	237019	TraceAnalysis
1	NELAP	T104704392-12-4	Midland

### Standard Flags

F	Description
B	Analyte detected in the corresponding method blank above the method detection limit
H	Analyzed out of hold time
J	Estimated concentration
Jb	The analyte is positively identified and the value is approximated between the SDL and MQL. Sample contains less than ten times the concentration found in the method blank. The result should be considered non-detect to the SDL.
Je	Estimated concentration exceeding calibration range.
MI1	Split peak or shoulder peak
MI2	Instrument software did not integrate
MI3	Instrument software misidentified the peak
MI4	Instrument software integrated improperly
MI5	Baseline correction
Qc	Calibration check outside of laboratory limits.
Qr	RPD outside of laboratory limits
Qs	Spike recovery outside of laboratory limits.
Qsr	Surrogate recovery outside of laboratory limits.
U	The analyte is not detected above the SDL
