Describe Cause of Problem and Remedial Action Taken:

A 30" Natural Gas gathering line operating at approximately 30 p.s.i. developed a leak. Date and time of loss is unknown, the leak area was discovered during a pipeline replacement.

Describe Area Affected and Cleanup Action Taken.* An area of pasture land measuring approximately 4,500 sq.ft. has discolored soil in the backfill material, the soil is dark to light gray in appearance. Final remediation will follow the NMOCD recommended guidelines for leaks and spills.

Confirmation soil samples collected from the Trunk "O" 30" Historical Remediation site indicate concentrations of BTEX, TPH and chloride are less than NMOCD Regulatory Standards.

Please reference the attached Basin Environmental Services Technologies Remediation Summary and Site Closure Request for details of remediation activities.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
