If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* The Trunk "O" Drip Tanks were removed and there was visual confirmation of a leak.		
Describe Area Affected and Cleanup Action Taken.* The area affected measured approximately thirty (30) feet in length, twenty three (23) feet in width and two (2) feet in depth. The impacted soil was removed and transported to Sundance Services Inc. for proper disposal. Confirmation samples were collected from the excavation floor and side walls. The samples were sent to an NMOCD approved laboratory, which determined concentrations of BTEX, TPH and chloride were less than the NMOCD regulatory standards. The site was backfilled with clean material and the surface was restored.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
