Describe Cause of Problem and Remedial Action Taken.*

A poly line leak released approximately 720 bbls of produced water into containment and flowed off location. Approximately 670 bbls were recovered.
Poly line was repaired. A sampling plan and remediation of the spill will be underway pending approval.

Describe Area Affected and Cleanup Action Taken.*

The spill area will be sampled and analyzed for Chlorides and Total Petroleum Hydrocarbons. The impacted area will be excavated, stockpiled on poly-plastic, and transported to an approve disposal facility. Clean material will be backfilled within the excavated area to normal grade.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
