<b>By Whom?</b> Stephen Gwin	<b>Date and Hour:</b> 10/20/14	
<b>Was a Watercourse Reached?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<b>If YES, Volume Impacting the Watercourse:</b> Not Applicable	
<b>Depth to Water.</b> ~25 ft bgs		
<b>If a Watercourse was Impacted, Describe Fully.*</b> Not Applicable		
<b>Describe Cause of Problem and Remedial Action Taken.*</b> Approximately 13 bbls of produced water and oil were released when a valve was left open and fluid gravity fed to the ground. A vacuum truck was dispatched to pick up any free standing liquids. Approximately 11 bbls were recovered.		
<b>Describe Area Affected and Cleanup Action Taken.*</b> Approximately 3,000 square feet of surface area was impacted by the release. This tank battery is scheduled to be replaced in February 2015 with construction of the new battery location currently underway. Chevron proposes the stained caliche in the area of the release be removed, hauled to state approved disposal facility, and replaced with clean caliche. Full remediation of the old tank battery area shall occur when the new tank battery comes online. At that time soil samples will be collected from the area and submitted to Cardinal Laboratories for testing. Upon receipt of laboratory analytical data from soil samples to be collected during delineation operations, EPI will prepare and present a Remediation Proposal for NMOCD approval.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Gentlemen,

Attached for your review is the Initial C-141 for the Indian Draw Tank Battery operated by Chevron.

This tank battery is scheduled to be replaced in February 2015 with construction of the new battery location currently underway. Chevron proposes the stained caliche in the area of the release be removed, hauled to state approved disposal facility, and replaced with clean caliche. Full remediation of the old tank battery area shall occur when the new tank battery comes online.
