Re: Application for **Revised** Non-Standard Location
Administrative Order NSL-5221
Basin Fruitland Coal
San Juan 32-8 # 267 API# 30-045-33075
Surface Unit Letter P, Section 14, T32N R8W 925' FSL & 1054' FEL
Bottomhole Unit Letter A, Section 23, T32N R8W 240' FNL & 1200' FEL
San Juan County, New Mexico

Mr. Stogner:

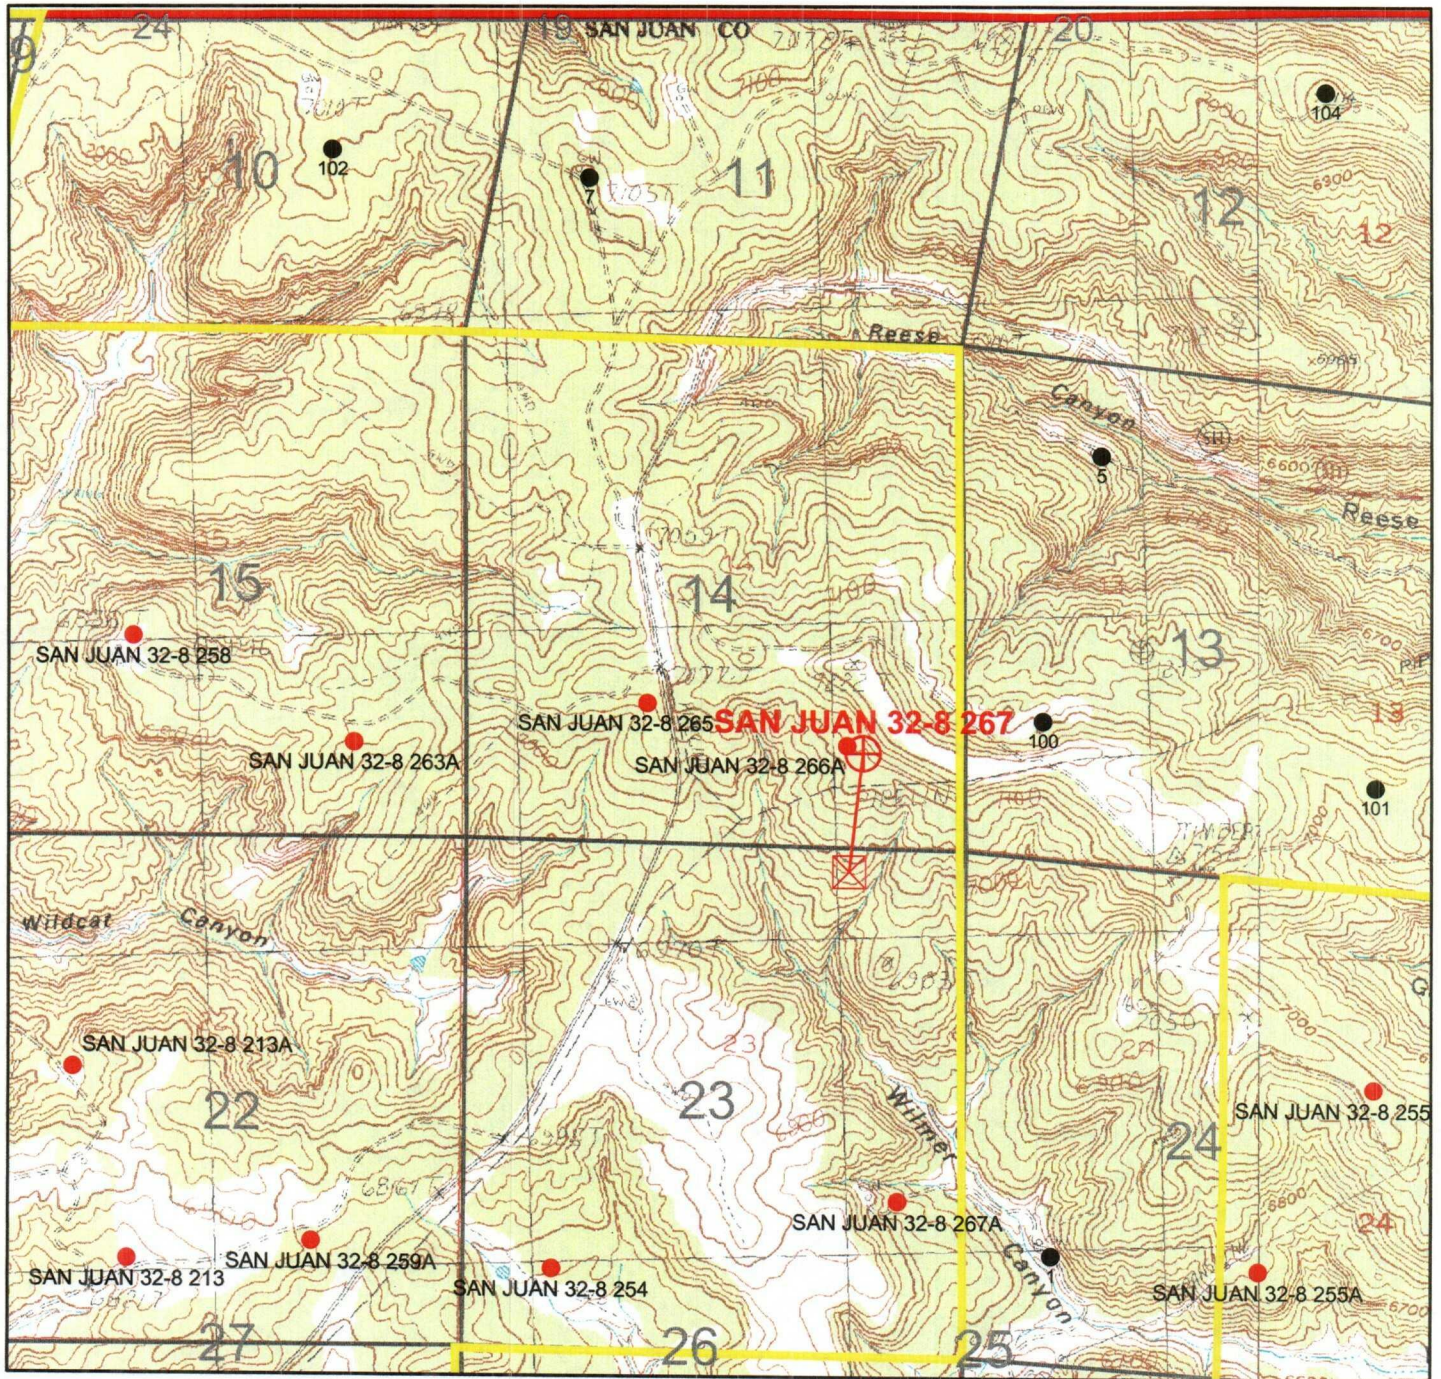

Due to a Bureau of Land Management request that we again reduce the length of the access road to the #267 well as much as possible, we are proposing to drill this well directionally. With directional drilling and accessing the surface location of the #267 well from the existing San Juan 32-8 #266A well pad (plat attached) the BLM's request will be satisfied. Attached is a letter from our surveyor stating the BLM concerns and the C-102. Because we have not previously drilled directionally in this area we want to keep our step out distance at or near 1000'. The proposed step out distance is 1174' and a legal location would require a step out distance of at least 1585'. A horizontal well is not recommended due to the presence of multiple coal seams.

We are our own offset to this well.

ConocoPhillips respectfully requests that a revised non-standard location for the Fruitland Coal well be issued for the reasons cited above. If there are any questions concerning this application, please feel free to call at (832)-486-2326.

Sincerely,

Deborah Marberry

**Re: San Juan 32-8 #267
925 FSL 1054 FEL
Section 14, T32N R8W
San Juan Co., NM**

To Whom It May Concern:

The San Juan 32-8 #267 is a proposed Basin Fruitland Coal and is located inside a Federal Unit. This well was staked at 925 feet from the south line and 1054 feet from the east line of Section 14, T32N R8W because of the Bureau of Land Management request that we reduce the length of the access road as much as possible. If anyone has any questions or would like to field review the proposed well location please contact me at 505-599-3456.

Sincerely,

Gordon Chenault
