If a Watercourse was Impacted, Describe Fully.*
NA

Describe Cause of Problem and Remedial Action Taken.*
Halliburton was performing the fracture treatment on Stage 16 when a check valve (dart valve) washed out causing the spill. The water immediately soaked in the ground so a vacuum truck was not used.

Describe Area Affected and Cleanup Action Taken.*
20' x 40'. Since the water soaked into the ground instantly, immediate cleanup was not possible.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
