NATURE OF RELEASE

Type of Release: Produced water and crude oil	Volume of Release: 3 bbls crude oil and 5 bbls produced water	Volume Recovered: 3 bbls total fluid
Source of Release: 2 7/8" flow line	Date and Hour of Occurrence: 9/2/12 time unknown	Date and Hour of Discovery: 9/2/12 at 8:00 a.m.
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The 2 7/8 inch flow line developed a leak due to external corrosion. A temporary leak clamp was installed on the pipe.

Describe Area Affected and Cleanup Action Taken.*

The spill occurred in the lease road, approximately 200 sq. ft. was affected by the release and response activities. The saturated soil was removed from the road way and placed on a nearby well pad. Clean caliche was used to cover the area for traffic use. The spill will be remediated in accordance to the NMOC D recommended guidelines for spills.

Confirmation soil samples collected from the floor and sidewalls of the PLU #183 excavation were analyzed by an NMOC D-approved laboratory, which determined concentrations of BTEX, TPH and Chloride were less than NMOC D Regulatory Standards in each of the submitted soil samples with the exception of soil sample WSW (In-Situ), which exhibited a chloride concentration of 1,220 ppm. Further excavation to the west was limited due to the presence of a widely used oil field access road. The final dimensions of the excavation were approximately 12' x 32' and 5' in depth. On February 27, 2014, approximately 60 cy of impacted soil was excavated and transported to an NMOC D-approved disposal facility. **Please reference the attached Basin Environmental Services Technologies Remediation Summary and Risk-Based Site Closure Request for details of remediation activities.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
