Based on our 9/10/2012 telephone conversation, Yates will delineate for decreasing levels of chlorides. As soon as I receive results I will contact you.

Thank you.

Bob,

On the Cohiba, the chloride levels in the last sampling event are increasing with depth. The 5' interval shows 1630 mg/kg with the 7' interval showing 2540 mg/kg. I would be reluctant to approve closure with no indication of at least a downward trend.

Call or come by the office if you want to discuss it.

No problem, I totally understand. Thanks again for looking into this.

Also with my voicemail I left earlier, I was checking on the Cohiba BPY State #1, 2RP-817, for status on the Final C-141 (submitted on 8/27/2012) and backfill request.

Thank you.

Bob,

This was completely an error on my part – and a little disturbing. I hope this was the only one, as I usually process several closures at once. I will image a signed copy to the RP and well file right now. Sorry, and thanks for catching it.

Mike,

I saw that the Final C-141 has been scanned into OCD Online, but not signed. Is everything with the C-141 acceptable?

Thank you.

Subject: Request to Backfill (2RP-816)

Mike,

Yates would like to request permission to backfill at Stogey BLG State Com. #1-H. All work complete per Final C-141 (8/13/2012).

Thank you.
