NATURE OF RELEASE

Type of Release	Produced Water	Volume of Release	45 bbls	Volume Recovered	30 bbls
Source of Release	Fiberglass line	Date and Hour of Occurrence	8/4/11 8:30 am	Date and Hour of Discovery	same
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A buried fiberglass line burst inside the junction box. The line has been repaired and remediation has begun.

Describe Area Affected and Cleanup Action Taken.* 17,000 sq ft of land has been disturbed along the pipeline right-of-way. RECS personnel were on site beginning on August 4th, 2011 to work the D State #49 Battery. Initial surface samples were taken along the release area and field tested for chlorides and hydrocarbons. The samples were then taken to a commercial laboratory for analysis. Two verticals were installed at the site to determine the depth of contamination at the site. Based on the vertical data, two excavations were dug at the vertical sites. The northwest excavation was excavated to 4 ft bgs and the west excavation was excavated to 5 ft bgs. Final samples of the walls and bottoms of each excavation were taken to a commercial laboratory for analysis of chlorides and hydrocarbons. Two scrapes were completed at the site. Both the northwest and south scrapes were scraped to a depth of six inches. After the scrapes were completed, six points were taken along the length of the south scrape and taken to a commercial laboratory for analysis. The walls and bottom samples of the northwest scrape were also taken to a commercial laboratory for analysis. The excavated soil was taken to a NMOCD approved facility for disposal. Clean soil was imported to the site to use as backfill. The lease road was backfilled with caliche and the excavations and scrapes in the pasture were backfilled with top soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
