NMOCD ARTESIA

Describe Area Affected and Cleanup Action Taken.* On March 26th, 2012, RECS personnel initiated work at the NB Tween #25. A liner had been installed prior to the installation of the wellhead to inhibit the downward migration of constituents during the drilling and work-over of the wellhead. Soil samples were collected from the site at ground surface and field tested for chlorides. The samples were then submitted to a commercial laboratory for chloride, BTEX and TPH (GRO/DRO) analyses. Laboratory readings returned with high chloride results across the release area with appreciable BTEX and TPH readings near the wellhead. The affected areas from the release were scraped down one foot until the walls and bottoms of the scraped areas field tested below 250 mg/kg for chlorides. Representative grab samples were collected from the excavation walls and composite samples from the bottoms of the excavations. These samples were submitted to a commercial laboratory for chloride analyses. All samples returned results below 250 mg/kg except for the south wall of the east scrape which returned a result of 256 mg/kg. All excavated soil was removed to a NMOCD approved disposal facility. The site was backfilled with clean, imported soil and contoured to the surrounding location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
