Reference: Chevron USA * Government D 4 * 30-015-24921 * G-1-21s-27e * Eddy County, New Mexico
NMOCD Reference Number: 2RP-1455 * Date of release: 12/3/12

Cliff,

Your proposal for remediation of the above referenced release is approved. The site is situated on Federal surface and may require like approval by BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

Subject: Chevron-Government D #4-Remediation Plan

Mike,

This e-mail is to confirm our discussion on January 14, 2013 concerning the remediation plan for the release that occurred at the Chevron Government D #4 tank battery. I have attached the site drawing and the summary of the laboratory data we reviewed during our discussion for your files. As agreed, Chevron will excavate impacted soils in the areas of SP1, SP2, and SP3 to a depth of 2 feet. In the area around SP4, the excavation will be 5 feet in depth then a compacted clay liner will be installed. In the areas depicted on the drawing by SP5, SP6, SP7, SP8, and SP9, the soil will be excavated to a depth of 1.5 feet. Confirmation sidewall samples will be taken from the 5 foot excavation around SP4 and analyzed for TPH, BTEX, and Chloride. These sample results will be forwarded to the OCD and discussed to obtain backfill approval. Once backfill approval is received, the site will be backfilled with clean soil. The depth to groundwater in this area is less than 50 feet.

If you would please reply back via e-mail with your concurrence of this remediation plan, it would be greatly appreciated.

Chevron and I thank you for your assistance in handling this matter.

Thanks, Cliff
