Describe Cause of Problem and Remedial Action Taken.*
Truck driver allowed truck to overflow while collecting an oil load from the LACT unit. LACT unit was turned off upon discovery of the release preventing more oil from being released.

Describe Area Affected and Cleanup Action Taken.*
64 BBLS of oil was released. All oil released remained on location. Size of the affected area is approximately 350'x 50'. 30BBLS of oil was recovered via vacuum truck. Affected soil was treated in place by Enviroclean Services.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good afternoon,

My apologies,

The original paperwork I submitted stated that 65BBLS of oil was released at the Cotton Draw Unit 172H on April 15, 2015. My documentation was incorrect; it was only 64BBLS of oil released. Attached is an amended C-141 for your records.

Apologies for my error and have a spectacular day
