Subject: RE: Lost Tank 33 #10 Assessment Report and Closure Plan

Thanks, Tim, for getting the work plan in! I do have a several questions regarding the plan prior to approval. I have sent the questions to Rick Kerby as well.

I appreciate your clarification to these questions and look forward to hearing from you.

1. What is your anticipated volume of soil to be excavated, stockpiled, and remediated on site?
2. Once soils are excavated, where is the location of the proposed land farming of the excavated soils? And will the proposed site be of adequate size and utility?
3. What treatment technique is meant by "stockpiles will be worked onsite" in the first paragraph beneath the heading Work Plan on page 2?

I have received an e-mail copy of the work plan for the above mentioned site and am in the process of reviewing. I need clarification to a couple of points before approval of work plan can be given. I will be directing the questions to Tim Reed as well.

1. What is your anticipated volume of soil to be excavated, stockpiled, and remediated on site?
2. Once soils are excavated, where is the location of the proposed land farming of the excavated soils? And will the proposed site be of adequate size and utility?
3. What treatment technique is meant by "stockpiles will be worked onsite" in the first paragraph beneath the heading Work Plan on page 2?

Thanks, Rick.
