If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* Hole in the bottom of the tank allowed fluid to leak out on the ground. All fluid contained inside secondary containment		
Describe Area Affected and Cleanup Action Taken.* Due to hard rock, the area was excavated to a depth of 15 inches. According to the Water map the groundwater is >100' bgs. At a depth of 5' samples were taken and were below the acceptable levels.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
