**RECEIVED**

Describe Cause of Problem and Remedial Action Taken.\* Mario Garcia (432)202-4333 with M&G rental tools was avoiding driving through mud puddle in road and drove off road and over flow lines. Flow line on WB#92 was damaged releasing fluid on the road into a puddle of fresh water, adjacent shrubbery, and a small amount into the pasture. Total fluid released was approximately 2 bbl total fluid. Mario Garcia called in Double R trucking to pick up liquids and will accept full liability and cost for the spill. Manuel with BTS (575) 942-8307 repaired the line.

Describe Area Affected and Cleanup Action Taken.\* Puddle was approx 30ft x 20ft, area affected in pasture was to the south approx. 2ft x 30ft. Michael Burton with DFSI (575)942-4115 will handle further assessment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
