If a Watercourse was Impacted, Describe Fully.\*

N/A

Describe Cause of Problem and Remedial Action Taken.\*

A 3" poly line ruptured. The line has been repaired and returned to service

Describe Area Affected and Cleanup Action Taken.\*

Tetra Tech inspected and collected samples to define the spill extents. Based on the results, a work plan was submitted to the OCD for approval. The impacted soil above the RRAL and elevated chloride concentrations was removed and transported to CRI for proper disposal. Once excavated to the appropriate depths, the excavations were backfilled with clean soil to grade. Tetra Tech prepared a closure report and submitted to NMOCD for review.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
