Reference: OXY USA \* Sand Dunes 34 Fed 2 (CTB) \* 30-015-27239 \* H-34-23s-31e \* Eddy County, New Mexico  
NMOCD Reference Number: 2RP-1337 \* Date of release: 10/8/12

Cliff,

Your proposal for remediation of the above referenced release is approved. Please proceed on your schedule.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

**Subject:** Oxy-Sand Dunes 34 Federal #2 Central Tank Battery

Mike,

On behalf of Oxy, BBC is submitting this remediation plan for the spill that occurred at the Sand Dunes 34 Fed #2 Central Tank Battery. I have attached a site diagram that depicts the spill area, sample points, and the areas to be remediated. Along with that there is a groundwater plot and lab data summary table. In addition, the original lab data is also attached. In addition, I have attached the approval from Jennifer Van Curen of the BLM for this plan.

Based on the analytical data, Oxy proposes to excavate the impacted soil inside the battery area to a depth of 2 feet (blue shading on drawing). Outside of the battery is an area that was impacted by over spray and this area will be surface scraped and restored to normal site conditions green shading on drawing). The excavation will then be backfilled with the appropriate material.

If you will please review at your earliest convenience and reply back via e-mail with the OCD's approval, it would be greatly appreciated. The site will then be scheduled to be remediated. If you have any questions, please contact me.

Thank you,

Cliff
