RE: No. 3M Gage
870' FNL & 1770' FWL, Sec 20-T30N-R10W
Blanco Mesa Verde and Basin Dakota
San Juan County, New Mexico

Dear Mr. Hoover:

The Farmington District Office (FDO) of the Bureau of Land Management (BLM) has received your correspondence on July 29, 1996, for downhole commingling of the Blanco Mesaverde and Basin Dakota in the above referenced well.

The Dakota formation had a 1996 mid-year production average of 45 Mcfgpd with a bottom hole pressure of 842 psia and a BTU value of 1109. The Mesaverde formation had a 1996 mid-year range of 60 Mcfgpd with a bottom hole pressure of 504 psi and a BTU value of 1179. Historically, the Dakota formation has slightly greater condensate production, with a historic yield of .0012 bbl/mcf verses .0011 bbl/mcf for the Mesaverde. Using these figures, the allocation for this well will be as follows:

Formation	Gas Allocation	Oil Allocation
Dakota	43%	55%
Mesaverde	57%	45%

Under provisions of 43 CFR 3165.3, you may request an Administrative Review of the order(s) described above. Such request, including all supporting documents, must be filed in writing within 20 business days of receipt of this notice and must be filed with the State Director, Bureau of Land Management, P. O. Box 27115, Santa Fe, New Mexico 87502-0115. Such request shall not result in a suspension of the order(s) unless the reviewing official so determines. Procedures governing appeals from instructions, orders or decisions are contained in 43 CFR 3165.4 and 43 CFR 4.400 *et seq.*

If you have further questions regarding this matter, please contact Brian W. Davis at (505) 599-6367 or (505) 599-8900.

Sincerely,

/s/ Duane Spencer
