RECEIVED

Describe Cause of Problem and Remedial Action Taken.*

Lightning struck the fiberglass produced water tank, resulting in releasing produced water within the bermed and lined battery. The well was shut in, valve replaced and a vacuum truck was called to the location.

Describe Area Affected and Cleanup Action Taken.*

An approximate area of 20' X 80' all within lined/bermed battery. Vacuum truck recovered produced water. The liner was not damaged and is intact allowing all produced water to be recovered. The tanks will be replaced and the location will be put back into service. Depth to Ground Water: < 50' (approximately 31' per NMOSE'), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 20. Based on all produced water recovered and the battery lined, Yates Petroleum Corporation requests closure. ← work plan required (fmp)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
