**Re: 4th Amendment to NMOC Order PLC-373-C/OLM-82-B
Lybrook Trunk Line #1 Gathering System
Sandoval County, New Mexico**

Dear Ms. Bailey, Mr. Evans and Mr. Roybal:

Encana Oil & Gas (USA) Inc. (Encana) requests Administrative Approval to tie-in additional wells to the Lybrook Gathering System #1 (LGS), identification number of PLC-373-C/OLM-82-B. Encana requests approval to commingle natural gas for the leases and wells listed on Attachment No. 1 which reflects the forty-eight (48) wells currently approved for Pool and Lease Commingling, under PLC-373-C/OLM-82-B, as well as the thirty-four (34) additional wells Encana requests approval to tie into the LGS. Moreover, Encana requests approval to claim beneficial use at the gas lift injection meter on the well pad, which is depicted for each well pad, on the gas lift schematics presented in Attachment No. 6.

Encana is the Operator of all eighty-two (82) wells proposed for interconnection to the LGS. The LGS has been installed and will continue to be maintained and operated by Encana. The addition of the thirty-four (34) wells requires surface commingling of gas, and in some cases off-lease measurement and sale of produced natural gas, as well as off-lease transportation and sale of oil and condensate. There will not be any commingling of oil or condensate in the pipeline and there is no Indian acreage associated with any of the wells to be added or currently tied into the LGS. As previously stated in the initial application, the LGS ties into Enterprise Products Partners' (Enterprise) existing pipeline in the SWNW of Section 36, T23N, R7W. The interconnection of the wells to the LGS will be known as a Central Delivery Point (CDP) gas custody transfer, as well as the Point of Royalty Measurement (PRM). A schematic of the Enterprise interconnection is provided as Attachment No. 2d. In the event Enterprise is hydraulically unable to accommodate all of the LGS natural gas production, Encana requested a second interconnection point with the 3rd Amendment to the located in the E2SE of Section 34, T23N R6W which will connect to Williams Field Services (Williams) existing pipeline. A schematic of the Williams interconnection is attached as Attachment No. 2d. In the event of a capacity constraint in the LGS, Encana will temporarily divert a portion of the LGS natural gas to the Williams CDP while simultaneously delivering the maximum amount possible to Enterprise. As noted in the 3rd Amendment, the Williams CDP option will only be utilized intermittently as needed, and in instances where both the Enterprise and Williams CDPs are utilized, the volumes and heating values from both meters will be combined before being allocated across the LGS. Lastly, for the purposes of requesting approval from the Bureau of Land Management (BLM), Encana requests commingling be reviewed and granted under Category 3 of the BLM's Instructional Memorandum (IM) dated July 3, 2013.

Encana Oil & Gas (USA) Inc., acting by and through its authorized agent,
Encana Services Company Ltd.

370 17th Street, Suite 1700, Denver Colorado 80202 720.876.5994(O) 720.289.4106 (C) shawn.turk@encana.com

As you are most likely aware, in order to optimally develop horizontal wells, Encana has proceeded with permitting various well pads in the section adjacent to the Project Area (PA) and/or developed acreage. Therefore, in some instances, the well pad surface hole location (SHL) is located off-lease. In these instances, Off-Lease Measurement of natural gas will occur at the well head by a well allocation meter and again at the pipeline tie-in to Enterprise's CDP and/or in the event of capacity constraints into Williams' CDP. Further, Encana intends to install a gas lift compressor on each well as depicted and described in Attachment No 6. Please note, Encana intends to submit to the BLM a sundry to formally request approval to install the gas lift on the additional thirty-four (34) wells proposed for tie-in to the LGS, which, once approved, will be forwarded on to the New Mexico Oil Conservation Division (NMOCD) for their approval. There will not be any commingling of oil or condensate with naturally produced gas in the pipeline.

If applicable, Off-Lease Measurement, Transportation and Sale of produced oil and condensate will occur at the surface location for the affected well where Encana will install the necessary number of 400-barrel oil storage tanks and water tanks. Generally, produced water will be measured using tank gauges and produced oil will be measured using a strapping table measurement by the associated vendors. Run tickets will be filled out onsite for each load of oil, which will show the tank gauge readings, oil gravity, temperature and BS&W content. Each valve on the tanks will have seals. Records will be kept that will show when seals are installed and removed. The tank seal information is also recorded on the run tickets, which will accompany the transportation of the oil.

Enclosed please find the following:

A. Administrative Application Checklist for Pool/Lease Commingling dated July 2, 2015

B. State of New Mexico Oil Conservation Division Form C-107-B, Amendment to Application for Pool/Lease Commingling (PLC-373-C/OLM-82-B) dated July 2, 2015. Attached to and made part of the Application for Pool/Lease Commingling and Off-Lease Measurement please find the following:

Attachment No. 1 (Five Pages): Presents the following information:

- | | |
|--|--|
| 1) Wells | 5) Projected gas rate for leases |
| 2) Leases | 6) Projected gas percentage in the LGS for the wells |
| 3) Pool information | 7) Projected initial gas heating value through ~1 st 6 months |
| 4) Projected gas rate for individual wells | 8) Projected gas heating value after ~1 st 6 months |

A projected decline rate for each well is also addressed in Attachment No. 1 in the Explanation Legend.

Please note Encana has renamed the following approved wells to be included in the pending Venado Canyon Unit: Lybrook P12-2206 01H, Lybrook P12-2206 03H, Lybrook P03-2206 01H, and Lybrook P03-2206 02H. The project area, pool, and lease information have all been modified to reflect the pending Venado Canyon Unit leases and pool information. Encana has also added the following wells to previously approved well pads: Lybrook A32-2306 02H, Lybrook H32-2306 02H, Lybrook E29-2306 02H & 04H, Lybrook I32-2306 03H & 04H, and the Lybrook M31-2306 01H & 04H. Please note Encana also added the following wells to the approved Gallo Canyon Unit project area: Gallo Canyon Unit 104H and Gallo Canyon Unit 202H. Finally, please note Encana has removed the following wells previously approved from the LGS due to changes in development planning: Lybrook M12-2206 01H, Lybrook N12-2206 01H, Lybrook H11-2206 01H & 03H, Gallo Canyon Unit E27-2309 02H, Lybrook L13-2306 01H & 02H, Lybrook I/P13-2306 01H & 02H, Gallo Canyon Unit I/P22-2306 01H, Lybrook G01-2206 01H & 02H, Lybrook N02-2206 01H & 02H, Lybrook H11-2206 02H & 04H, Lybrook P12-2206 02H & 04H, Lybrook E/F10-2206 01H & 02H, Lybrook I/P22-2306 01H & 02H, and the Lybrook M12-2206 02H.

Attachment No. 2a (Four Pages): Presents a map of the LGS pipeline, depicting all fifty-six (56) well pads (which represent all eighty-two wells) that will tie into the LGS which will then tie-in to Enterprise's CDP in the SWNW of Section 36, T23N R7W, and/or in the event of capacity constraints into William's CDP in the E2SE of Section 34, T23N R6W. Presently, thirty-seven (37) well pads (and forty-eight wells) have already been approved for connection to the LGS, and Encana is proposing to connect an additional nineteen (19) well pads (representing thirty-four wells) to the LGS. The LGS pipeline is approximately 45,000-feet in length, stretching

across both Bureau of Land Management (BLM) and State of New Mexico Land Office (NMSLO) surface. Encana received (BLM) approval for the Lybrook Trunk #1 Pipeline on February 22, 2013 for Federal surface and NMSLO approval on September 7, 2012 for State surface.

Each well will be equipped with a continuous recording gas allocation meter (or some form of approved alternative measurement) operated and maintained by Encana. Prior to converting any gas measurement from a conventional allocation meter to an alternative measurement method, Encana will seek formal approvals. The allocation procedures, including examples of how the allocation method would be applied for each well are presented on **Attachment No. 5**.

Moreover, Condensate and oil will be separated, stored and sold at the well head SHL, which in some instances, may be off-lease. Depending on their availability Encana will enlist the services of High Tech Tools, LLC (mailing address: PO Box 1244 Aztec, NM 87410; phone number: 505-334-2266) or Three Rivers Trucking, Inc. (mailing address: PO Box 2728, Farmington, NM 87499; phone number: 505-632-5300) to transport produced water to Basin Disposal Inc. (address: 300 Legion Road, Aztec, NM 87410; phone number: 505-334-3013). Produced water will be generally measured using tank gauges.

Encana will enlist Western Refining, to transport and purchase crude oil from the off-lease SHL to the Gallup Refinery (location: I-40, Exit 39, Jamestown, NM 87347; Route 3, Box 7, Gallup, NM 87301; phone number: 505-722-3833). Western Refining will provide a strapping table measurement for each oil tank at the facility which will be used to determine the exact volume in each tank. Run tickets will be filled out for each load of oil, onsite, which will show the tank gauge readings, oil gravity, temperature and BS&W content. Each valve on the tanks will have seals. Records will be kept and logged into an internal database that will show when seals are installed and removed. The tank seal information is also recorded on the tickets, which will accompany the transportation of the oil.

Attachment No. 2b (One hundred and fifteen (115) pages including cover sheets): Due to the significant number of changes included in Attachment 1, Encana has provided original or revised C-102s, as well as a plat depicting contemplated wellbores for wells that are in the surveying process, for all eighty-two (82) approved and proposed wells in the LGS. Please note that some of these locations have yet to be reviewed with the appropriate mineral and surface owner and could change SHL; when and if that occurs Encana will provide notice as to the changes.

Attachment No. 2c Justification (Three pages): Presents a plat depicting individual well pad pipeline connection paths for all fifty-six (56) well pads connecting to the LGS. However, for the purposes of this application, and in accordance with the BLM's IM dated July 13, 2013, the following discussion will only apply to the proposed addition of the nineteen (19) well pads (which represent the additional thirty-four (34) wells) Encana is requesting be interconnected to the LGS. The Attachment No. 2c plat contemplates, as an alternative, individual well pad connections versus one (1) gathering system, namely the Lybrook Trunk #1 Gathering System (LGS). Also included, is a breakdown of pipeline length and pig launcher and receiver disturbance for each of the nineteen (19) well pads and projected costs for such an undertaking. According to our calculations individual well pad pipeline connections for the nineteen (19) additional well pads would total approximately one hundred and forty-four (144) miles in length; and, including a 40-foot width for the pipeline right-of-way, the acreage disturbance would be 698.35 acres. Additionally, Encana estimates that a pig launcher and receiver would be required for the nineteen (19) individual well pad pipeline connections into Enterprise's pipeline and in the event of capacity constraints into William's CDP, which would also cause more surface disturbance. Encana estimates that pig launchers and receivers could potentially be 10-feet by 20-feet for each of the nineteen (19) individual well pad pipeline connections. Encana estimates that such an undertaking would cost approximately \$31.7 million. Again, the breakdown included in Attachment No. 2c will provide more detail as to how Encana arrived at these conclusions. Currently, Encana's estimated costs for the LGS is \$7.5 Million, which includes the connection of all fifty-six (56) well pads.

Furthermore, all production proposed for commingling derives from the same geologic formation with similar projected gas rates and gas heating values as well as projected decline rates, which are addressed in Attachment No. 1.

In line with Encana's commitment to conduct business ethically, legally, and in a manner that is fiscally, environmentally and socially responsible, it is Encana's position that one (1) gathering system greatly reduces surface disturbance and thus environmental impact; and, is more economically feasible, allowing for potential capitol to be dedicated towards future development projects in the San Juan Basin.

Attachment No. 2d (One page): Presents depictions of the Enterprise CDP interconnection and the Williams CDP interconnection. Again, the Williams CDP will only be utilized in the event the Enterprise CDP is hydraulically unable to accommodate all of the LGS natural gas production. In the event of a capacity constraint, Encana will temporarily divert a portion of the natural gas to Williams CDP in the E2SE of Section 34, T23N R6W, while simultaneously delivering the maximum possible to Enterprise. This option will allow gas that would otherwise be shut-in during a capacity expansion delay or other upset on the Enterprise line to have a means of being delivered to sales. The Williams CDP option will only be utilized intermittently as needed, and in instances where both the Enterprise and Williams CDPs are utilized, the volumes and heating values from both meters will be combined before being allocated across the LGS. As required by the NMOCD, Encana has provided notice to all interest owners of this application.

Attachment No. 3 (Twelve pages): Presents a leasehold ownership summary for all of the eighty-two (82) wells. The royalty interest is Federal and State. There is no Indian Royalty. The interest ownership reflected for each well is to the best of our knowledge at this time. In the event it is determined that interest ownership differs, an updated Attachment No. 3 will be sent to affected owners, the BLM, NMSLO and the NMOCD. As required by the NMOCD all interest owners for the additional thirty-four (34) wells that Encana is proposing to tie into the LGS have been given notice of this application.

Attachment No. 4 (Sixteen pages): Presents a copy of the notice sent to the interest owners for the wells. All notice letters have been mailed certified, return receipt. Upon receiving the return receipts, copies will be forwarded to the NMOCD. Also included, is a copy of the legal notice to be published in The Daily Times, Farmington, New Mexico on May 31st, 2015 in order to provide public notice to any and all affected interest owners.

Attachment No. 5 (Five pages): Presents the allocation procedures for the LGS which includes an example of how the allocation method is applied. Encana proposes that the PRM be at Enterprises' CDP in the SWNW of Section 36, T23N R7W and in the instance of capacity constraints at the Williams CDP in the E2SE of Section 34, T23N R6W. For the purposes of both PRM scenarios Encana has provided allocation for single and multi-well pads that will interconnect to Enterprise only as well as an allocation procedure for single and multi-well pads that will interconnect to both the Enterprise CDP and the Williams CDP. Please also note each well proposed for connection to the LGS will be equipped with a continuous recording gas allocation meter.

Attachment No. 6 (Thirty pages including cover sheet): Presents gas lift well pad schematics for the thirty-four (34) wells that Encana is requesting to add to the LGS, as well as the twenty-one (21) wells that have changed names since original approval. Encana requests approval to claim beneficial use at the gas lift injection meter on the well pads, which is depicted for each well pad, on the gas lift schematics; which also depicts a list of proposed equipment. Encana requests the use of fuel to operate the gas lifts installed for each well.

In conclusion, Encana is requesting approval to tie-in thirty-four (34) additional wells to the Lybrook Trunk #1 Gathering System (LGS). Where applicable, Encana requests Administrative Approval for Off-Lease Measurement and Sale of natural produced gas and Administrative Approval for Off-Lease Measurement, Sale and Transportation of produced crude oil and condensate. Lastly, as requested in the initial application we are requesting that the NMOCD order issued for amendments as to additional wells being added to the LGS, also include a provision that for any future additions to the LGS, only the interest owners in the wells being added need to be notified.

Please feel free to contact me directly at 720-876-5994 with any questions or concerns.

Sincerely,

A handwritten signature in cursive script that reads "Shawn Turk".

RE: Amendment Number 4 to the Lybrook Gathering System

Dear Mr. McMillan,

Pursuant to recent discussions and per your request, this letter is intended to confirm that as of the date of this letter, the Working Interest percentages depicted in the subject Gathering System Application are to the best of my knowledge accurate and complete.

Please note the Working Interests shown are limited to a review of available records through the County Courthouse, Bureau of Land Management and other applicable agencies. As documents are not always filed/recorded accurately or timely, depicted percentages are subject to change. Encana Oil & Gas makes no warranties whatsoever as to the accuracy of the ownership percentages shown as these calculations are based on the opinions and interpretations of oil and gas professionals and are dependent upon the proper recordation of pertinent instruments.

Should you have any questions or concerns please contact me by any means listed below.

Sincerely,

Megan E. Gross

APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: Encana Oil & Gas (USA) Inc.
OPERATOR ADDRESS: 370 17th Street, Suite 1700, Denver, Colorado 80202
APPLICATION TYPE:

☐ Pool Commingling ☐ Lease Commingling ☒ Pool and Lease Commingling ☒ Off-Lease Storage and Measurement (Only if not Surface Commingling)

LEASE TYPE: ☒ Fee ☒ State ☒ Federal

Is this an Amendment to existing Order? ☒ Yes ☐ No If "Yes", please include the appropriate Order No. PLC-373-C/OLM-82-B
Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling
☒ Yes ☐ No BLM Reference No. 3162.7-3

(A) POOL COMMINGLING

Please attach sheets with the following information

(1) Pool Names and Codes	Gravities / BTU of Non-Commingled Production	Calculated Gravities / BTU of Commingled Production		Calculated Value of Commingled Production	Volumes
Lybrook Gallup (42289)	41° API/1350 BTU	Only gas to be commingled 1350 BTU		Only gas to be commingled Value = +/- \$3.30 mmbtu	5-500 mcf/d
Wildcat Gallup (97981)	41° API/1350 BTU				5-500 mcf/d
Counselors Gallup-Dakota (13379)	41° API/1350 BTU				5-500 mcf/d
Basin Mancos Gas (91232)	41° API/1350 BTU				5-500 mcf/d

(2) Are any wells producing at top allowables? ☐ Yes ☒ No

(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No

(4) Measurement type: ☒ Metering ☐ Other (Specify)

(5) Will commingling decrease the value of production? ☐ Yes ☒ No If "yes", describe why commingling should be approved

(B) LEASE COMMINGLING

Please attach sheets with the following information

(1) Pool Name and Code.

(2) Is all production from same source of supply? ☐ Yes ☐ No

(3) Has all interest owners been notified by certified mail of the proposed commingling? ☐ Yes ☐ No

(4) Measurement type: ☐ Metering ☐ Other (Specify)

(C) POOL and LEASE COMMINGLING

Please attach sheets with the following information

(1) Complete Sections A and B.

(D) OFF-LEASE STORAGE and MEASUREMENT

Please attached sheets with the following information

(1) Is all production from same source of supply? ☒ Yes ☐ No

(2) Include proof of notice to all interest owners. See Attachment 4.

(E) ADDITIONAL INFORMATION (for all application types)

Please attach sheets with the following information

(1) A schematic diagram of facility, including legal location. See Attachment No. 2 and Attachment No. 5

(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved. Attachment No. 2

(3) Lease Names, Lease and Well Numbers, and API Numbers. See Attachment No. 2

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

The map displays a grid of land sections numbered 22 to 36. Section 27 contains a red-outlined area labeled "UNCOMMITTED TRACT". Various boundary lines are shown with precise bearings and distances, often accompanied by "RECORDED" or "MEASURED" labels. A prominent diagonal line runs from the top left towards the bottom right, with a bearing of S47°20.4'E and a distance of 626.0'. Other notable measurements include a long horizontal boundary at the top with a bearing of N89°06.3'E and a distance of 1769.6'. The map also includes a north arrow pointing towards the upper left.

The interest reflected for each well is to the best of Encana's knowledge at this time. In the event it is determined that interest ownership differs, an updated Attachment No. 3 will be sent to affected owners and the appropriate agencies.

Attachment No. 4
Encana Oil & Gas (USA) Inc.
Lybrook Trunk #1 Gathering System
Sandoval County, New Mexico
Amendment Dated May 29, 2015

As evidence that all interest ownership parties in the subject well have been given notice of Encana's application, attached please find:

- 1) The Leasehold Interest Owner's Address List for the additional wells tying into the Lybrook Trunk #1 Gathering System.
- 2) A copy of Encana's letter, dated May 29, 2015 used to send copies of the subject application to the leasehold interest owners for the additional wells connecting to the Lybrook Trunk #1 Gathering System. The letters were transmitted via certified mail/return receipt.
- 3) Copy of Encana's letter to The Daily Times, requesting a legal ad run May 31, 2015 in order to provide effective notice to interest owners of the amendment to the Lybrook Trunk #1 Gathering System.
- 4) All royalty interest is State and BLM. Since the NMSLO and the BLM are receiving this application requesting their approval, a separate notice letter was not sent to the royalty interest owners. The application to the NMSLO and BLM were transmitted via certified mail/return receipt.

Re: 4th Amendment to the Lybrook Trunk #1 Gathering System
Application for Pool and Lease Commingling
Add Wells to Gathering System and Off-Lease Measurement (if applicable)
Sandoval County, New Mexico

Dear Interest Owner:

Encana Oil & Gas (USA) Inc.'s (Encana) is seeking administrative approval from the New Mexico Oil Conservation Division (NMOCD) to add additional wells to Encana's Lybrook Trunk #1 Gathering System (LGS) which was originally approved by the NMOCD on April 29, 2013 (Administrative order PLC-373 and PLC-373-A/OLM-82). The LGS is operated by Encana, and the addition of wells will require surface commingling of gas, and in some cases off-lease measurement and sale of produced natural gas, as well as off-lease transportation and sale of oil and condensate. All of the additional wells proposed to tie into the LGS will be operated by Encana. Encana has applied for the necessary rights-of-way to install, operate, and maintain the LGS.

Off-Lease Measurement and Sale of produced natural gas, as well as Off-Lease Transportation and Sale of crude oil and condensate, may also be applicable for some of the additional proposed wells tying into the LGS. If applicable, Off-Lease Measurement of natural gas will occur at the well head by a well allocation meter and again at the pipeline tie-in to either Enterprise Products Partners' central delivery point, or the second central delivery point to Williams Field Services gas custody transfer meter.

The wells will be equipped with individual gas measurement equipment for allocation purposes and will benefit from central compression which should keep wellhead operating pressure as low as possible. There will not be any downhole commingling of oil or condensate and there is no Allottee or BIA acreage associated with any of the proposed wells.

If applicable, Off-Lease Measurement, Transportation and Sale of produced oil and condensate will occur at the surface location for the affected well where Encana will install the necessary number of 400-barrel oil storage tanks and water tanks. A gathering company will purchase and transport the product to refining. A strapping table measurement for each oil tank will determine the volume in each tank with run tickets will be filled out at the surface location for each load. Tank seal information will also be recorded to accompany the transport.

This matter does not require any action on your part. Current NMOCD Regulations require that all affected interest owners receive notice of Off-Lease Measurement, Transportation and Sale, and receive notice of proposed future additions to the LGS. Included in Encana's Gathering System application is a request that for future additions to the LGS, only the interest owners in the wells to be added will require notification provided that the proposed additions do not adversely affect the existing wells in the LGS. This will greatly simplify adding wells to the gathering system. Should you have any questions, concerns or need additional information please contact me at your earliest convenience at Megan.Gross@encana.com and/or 370 17th Street, Suite 1700, Denver, Colorado 80202.

Re: Legal Ad Placement Request
Sunday, May 31, 2015 Publication
Amendment to Lybrook Trunk #1 Gathering System
Sandoval County, New Mexico

Ladies and Gentlemen:

Encana Oil & Gas (USA) Inc. (Encana) respectfully requests The Daily Times place the following notice in the Legal Ads Section for the May 31st, 2015 publication. Once the ad has run, please send an Affidavit of Publication to the undersigned.

Encana Oil & Gas (USA) Inc. (Encana) is seeking administrative approval from the New Mexico Oil Conservation Division (NMOCD), the New Mexico State Land Office, and the Bureau of Land Management (BLM) for an amendment to the Lybrook Trunk #1 Gathering System, PLC-373-C/OLM-82-B. Encana is requesting the addition of twenty five (25) wells to the previously approved Lybrook Trunk #1 Gathering System (LGS), which will require surface commingling. Said application also requests administrative approval of off-lease measurement and sale of naturally produced gas and in some instances off-lease transportation and sale of oil and condensate for various wells operated by Encana in Sandoval County, New Mexico. The Lybrook Trunk #1 Gathering System interconnects with Enterprise Products Partners' (Enterprise) pipeline in the SWNW of Section 36, Township 23 North, Range 7 West and Williams Field Services' (Williams) Pipeline in the E2SE of Section 34, Township 23 North, Range 6 West, which are known as the Central Delivery Points (CDPs).

At this point in time, Encana is unable to confirm with absolute certainty interest ownership in wells that will produce from the following Project Areas (PA): Sections 25 and 26 in Township 23, North Range 7 West (NM 28747 & unknown lease). Encana is currently in the process of ordering title opinions for said PAs. No commingling of oil or condensate with natural gas will occur in the pipeline. The project areas described above will be completed in the Counselor's Gallup-Dakota Pool (Order No.13379).

Any person holding an interest in the unknown lease above may contact Encana for additional information and details (Attn: Megan Gross, (720) 876-3215, 370 17th Street, Suite 1700, Denver, Colorado 80202, Megan.Gross@encana.com). Any objection or request for a formal hearing should be filed in writing with the NMOCD's Santa Fe Office (1220 South St. Francis Drive, Santa Fe, NM 87505) within 20 days from the date of this publication. In the absence of objections, Encana is requesting that the NMOCD approve the amendment to the application administratively.

Sincerely,

A handwritten signature in cursive script that reads "Jessica Gregg".

The Lybrook Trunk #1 Gathering System interconnects with Enterprise Products Partners' (Enterprise) pipeline in the SWNW of Section 36, Township 23 North, Range 7 West and Williams Field Services' (Williams) Pipeline in the E2SE of Section 34, Township 23 North, Range 6 West, which are known as the Central Delivery Points (CDPs).

At this point in time, Encana is unable to confirm with absolute certainty interest ownership in wells that will produce from the following Project Areas (PA): Sections 25 and 26 in Township 23, North Range 7 West (NM 28747 & unknown lease). Encana is currently in the process of ordering title opinions for said PAs. No commingling of oil or condensate with natural gas will occur in the pipeline. The project areas described above will be completed in the Counselor's Gallup-Dakota Pool (Order No.13379).

Any person holding an interest in the unknown lease above may contact Encana for additional information and details (Attn: Megan Gross, (720) 876-3215, 370 17th Street, Suite 1700, Denver, Colorado 80202, Megan.Gross@encana.com). Any objection or request for a formal hearing should be filed in writing with the NMOCD's Santa Fe Office (1220 South St. Francis Drive, Santa Fe, NM 87505) within 20 days from the date of this publication. In the absence of objections, Encana is requesting that the NMOCD approve the amendment to the application administratively.

Gas Measurement Allocation Procedure for Single Well Pads

Base Data:

V = Gas Volume (MCF) from Custody Transfer Meter during allocation period (Enterprise Products Partners or Williams Field Services)
 R = Gas Volume (MCF) from Gas Return Meter (Encana)*
 W_1 = Gas Volume (MCF) from Wellhead Allocation Meter at individual wells during allocation period. (Encana)
 WI_1 = Gas Volume (MCF) from Well Injection Meter at individual wells during allocation period. (Encana)*
 Y = Heating Value (BTU/scf) from Custody Transfer Meter during allocation period. (Enterprise Products Partners or Williams Field Services)
 Z = Heating Value (BTU/scf) from individual Wellhead Allocation Meter and Well Injection Meter. (Encana)

Allocation Period is typically a calendar month and will be the same for all individual wells.

Attachment No. 5
Encana Oil & Gas (USA) Inc.
Lybrook Trunk #1 Gathering System
Sandoval County, New Mexico

Individual Well Gas Production = A + B + C + D + E

A = Allocated Gas production off lease, MCF: $[(W_1-R_1)/((W_1-R_1)+(W_2-R_2)+(W_n-R_n))]*(V)$

B = On lease fuel usage, MCF. Determined from equipment specification and operating conditions. This includes, but is not limited to, compression, vapor recovery unit (VRU) compression, burners, and pump jacks.

C = Lost and/or vented gas from well and/or lease equipment, MCF. Calculated using equipment and piping specifications and operating pressures.

D = Allocated fuel from gathering system equipment, MCF. The total fuel required to operate gathering system equipment will be allocated to the individual wells benefiting from the equipment using allocation factors determined by $[(W_1-R_1)/((W_1-R_1)+(W_2-R_2)+(W_n-R_n))]$.

E = Allocated volume of gas lost and/or vented from the gathering system, gathering system equipment, condensate collection, and water collection in MCF. The total volume will be determined using industry accepted procedures the time of the loss. The total volumes lost and/or vented will be allocated to the individual wells affected using factors determined $[(W_1-R_1)/((W_1-R_1)+(W_2-R_2)+(W_n-R_n))]$.

Individual Well BTU's = $[\{(W_n-W_{In}) * Z_n\} / \{SUM((W_n-W_{In}) * Z_n)\}] * (V * Y) * 1000]$

Individual well gas heating values to be determined in accordance with BLM regulations.

Gas Measurement Allocation Procedure for Multi-Well Pads

Attachment No. 5
Encana Oil & Gas (USA) Inc.
Lybrook Trunk #1 Gathering System
Sandoval County, New Mexico

Base Data:

V = Gas Volume (MCF) from Custody Transfer Meter during allocation period (Enterprise Products Partners or Williams Field Services)

X_x = Gas Volume (MCF) from Pad Allocation Meter during allocation period. (Encana)

R_x = Gas Volume (MCF) from Gas Return Meter at Well Pad (Encana)*

(X_x - R_x) = Gas Volume (MCF) for total Well Pad Production (Encana)

W_x = Gas Volume (MCF) from Wellhead Allocation Meter at individual wells during allocation period. (Encana)

WI_x = Gas Volume (MCF) from Well Injection Meter at individual wells during allocation period. (Encana)*

Y = Heating Value (BTU/scf) from Custody Transfer Meter during allocation period. (Enterprise Products Partners or Williams Field Services)

Z = Heating Value (BTU/scf) from individual Wellhead Allocation Meter and Well Injection Meter. (Encana)

Allocation Period is typically a calendar month and will be the same for all Well Pads and individual wells.

Allocate the off lease Custody Transfer volume back to the well pad

$$A_{AL} = \text{Well pad allocated volume (MCF)} = [(X_1 - R_1) / ((X_1 - R_1) + (X_2 - R_2) + (X_n - R_n))] * (V) + D + E$$

Distribute (allocate) the allocated well pad production, (A_{AL}) back to each well on the pad

Gas production (MCF) allocated back to the individual wells on a Well Pad is calculated using the formula:

$$AL\ Net_n = [(W_1 - WI_1) / ((W_1 - WI_1) + (W_2 - WI_2) + (W_n - WI_n))] * A_{AL}$$

Determine the final allocated production for each well on the pad

$$\text{Final allocated individual well production (MCF)} = AL\ Net_n + B_n + C_n$$

B_n = On lease fuel usage attributed to an individual well, MCF. Determined from equipment specification and operating conditions. This includes, but is not limited to, compression, vapor recovery unit (VRU) compression, burners, and pump jacks.
