Subject: SM Energy PDU 507, PDU Tract 1 Tank Battery, and Geronimo Sites

Mike –

This e-mail is to modify the submitted work plans for SM Energy Company indicated in the subject line per our meeting in your office. The scope of work provided in the work plans will be modified as discussed for the following sites:

1. PDU 507 – On Figure 4, the area around SB-9, AH-10, and AH-11 shows a proposed excavation depth to 5 feet. The modification to the submitted proposal will be to place a liner in this area at 5 feet prior to backfilling.
2. PDU Tract 1 Tank Battery – The area around AH-1 and SB-3 was proposed to excavate to 2 feet bgs. The modifications to the submitted proposal for this area will be to excavate to 5 feet bgs or as deep as practicable. In addition, the area proposed to have microblaze application will be left open and resampled to evaluate hydrocarbon concentrations over time. Finally, sample locations AB-1, AH-4 and AH-5 will be further delineated with mechanical equipment (backhoe or mini trackhoe) if space allows for the safe operation of the equipment.
3. Geronimo – No modifications were requested for this work plan.

Please let me know if you are good with the work plans with the above modifications. If so, we will implement the work plans pending BLM approval.
