NATURE OF RELEASE

Type of Release LOPC of heavy condensate from buried pipeline	Volume of Release Estimated 10bbl.	Volume Recovered: ~4bbl recovered from surface. Pipeline Repair Underway.
Source of Release Pinhole leak discovered in buried heavy condensate pipeline	Date and Hour of Occurrence Unknown	Date and Hour of Discovery 8/10/15 @ 14:00 hrs
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - NMOCD mike.bratcher@state.nm.us	
By Whom? Harley Everhart - EHS Technician III	Date and Hour 8/11/15 @ 11:46	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*

On 8/10/2015, Frontier received a call from an oilfield employee about a possible leak located at Lat: 32.780425N, Long: -104.220458W. Frontier identified the pipeline in question and immediately blocked in the Abo GP 16" Inlet. Frontier dispatched field personnel to positively identify the leak and upon arriving on site identified a puddle of heavy condensate gathered on the surface above a known underground condensate discharge pipeline. Notifications were made internally to the Environmental Group ~ 14:00 hours.

On 8/11/2015 Frontier estimated the release to exceed 5bbl and made prompt notifications to NMOCD.

On 8/11/2015 Frontier recovered ~4bbl free liquid from the surface with a hydrovac truck. All free liquid recovered was disposed of at an OCD approved facility. Excavation will commenced to delineate and remove contaminated soils and to restore integrity of the pipeline.

Describe Area Affected and Cleanup Action Taken.* OCD Pre-Approved Remediation Plan:

Recover free liquids, Excavate to repair line, Excavate to recover impacted soils, Use handheld PID to direct excavation crews prior to initial sampling, Excavation not to exceed one foot below pipeline, Complete analytical sampling, If above limits, place 20mil plastic barrier, and backfill with the most economical clean soil available.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
