Attention: Mr. Brett Liggett

Dear Mr. Liggett:

In reviewing your recent application to downhole commingle Mesaverde and Dakota production within the Rincon Unit Well No. 183, it was determined that you did not supply information regarding the current and original bottomhole pressures for these horizons. Please submit all the data required on Division Form C-107, as this will eliminate any delays in processing the application.

If you wish to establish a reference case for pressure data, please contact me to determine the process by which this may be accomplished.

Sincerely,

A handwritten signature in cursive script, appearing to read "David Catanach".

David Catanach
Engineer
