Dear Mr. Stogner:

XTO Energy Inc. hereby requests administrative approval for an unorthodox location for the above referenced well. Attached for your reference are the following exhibits:

1. Well location plat (NMOCD Form C-102)
2. Topographic map
3. Aerial photograph
4. Ownership map
5. Production map showing Mesaverde and Dakota Gas Production

The above referenced well is proposed to be drilled as a downhole commingled Mesaverde/Dakota well spaced as a 320 acre S/2 unit. An application for downhole commingling will be submitted to the NMOCD pending approval of the non-standard location.

The proposed location has been chosen south of the San Juan River due to inhibited access on the north side of the river. Because of the proximity of Citizen's Ditch as well as the wetland area between the ditch and the river, location access on the north side of the river is unavailable. The south bank of the river is approximately five feet higher than the north bank, and appears to be a dry area that is not prone to flooding. The proposed location access will involve the use of an existing road, thus eliminating additional surface disturbance for new road construction. The surface estate owner has agreed to the proposed location and access thereto, and has signed a Surface Use

Agreement with XTO. Drilling the above referenced well at the requested location will best preserve the surrounding surface while effectively and efficiently producing gas from the Mesaverde and Dakota Formations.

All of the offset operators have been notified of this application by certified mail and copies of the letters and receipts are attached.

XTO Energy Inc. requests your administrative approval for the unorthodox location based on the above information. Should you need any additional information, please contact me at (817) 885-2540.

Yours truly,

  
Christopher Spencer, CPL
