Logan,

As a follow-up to our phone conversation, the proposal to close the drilling pit at this site with the indicated levels of contaminated materials in place, is denied. It is my understanding that the data provided is field analyses for chloride levels only and samples are being lab tested for chloride and hydrocarbon constituents. I would suggest a review of the lab data prior to submitting an alternate closure plan.

Thank you,

Mike Bratcher

Mike,

Attached is a copy of the request of the ranking for the site with new proof of groundwater. The second attachment is notification of a release below the liner and a proposed remediation plan.

Thanks,  
Logan Anderson  
Elke Environmental
