Describe Cause of Problem and Remedial Action Taken.* The connection from the flow line to the heater treater was defective. The failed heater/flow line connection was repaired.					
Describe Area Affected and Cleanup Action Taken.* The spill occurred outside the facility firewalls. Majority of the spill was overspray west of the tank battery. The area was assessed to evaluate the spill. All samples were below the RRAL for TPH and BTEX. Elevated chloride concentrations were removed and hauled to CRI for disposal. The excavation was backfilled with clean soil. A closure report has been prepared and submitted to the NMOCD for review and approval.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
