RECEIVED

If a Watercourse was Impacted, Describe Fully.\*  
N/A

Describe Cause of Problem and Remedial Action Taken.\*  
Packing leaked from the well head. Repaired

Describe Area Affected and Cleanup Action Taken.\*  
Released covered 3'x50' on pad and 6'x100' in adjacent pasture. Area on pad will be scraped. Area in pasture will be sampled and blended with a tiller to minimize impact on surrounding vegetation. Burnett (J. Tittsworth) discussed the plan to clean up the pasture with both the BLM and the OCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
