Describe Cause of Problem and Remedial Action Taken.\*  
Restriction in flow line created high line pressure causing flow line to leak. Well was shut in. All free floating fluid was picked up by vacuum truck and Highlander/Tetra Tech was contacted to investigate.

Describe Area Affected and Cleanup Action Taken.\*  
Spill areas were sampled and defined. Impacted areas with TPH above the RRAL and areas with elevated chloride concentrations were excavated and the soils were hauled to Lea Land for disposal.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
