**Subject:** West Artesia Grayburg Unit Remediation Update

Mike,

Talon LPE took samples at the spill sites using their Geo Probe sample collector. Sufficient samples were titrated on site to determine the area and depth effected by the spills. Additional samples were collected and submitted to an independent laboratory for confirmation. The results should be available in one more week. A plan to remediate the spills will be prepared using the results and forwarded to you for your approval. Please feel free to contact me on my cell at 432-770-9738 if you have any questions.

Regards

Marty Bloodworth
