**Subject:** RE: Alamo Permian State 32 Tank Battery Final Work Plan

Reference: Alamo Permian \* State 32 Tank Battery (2 release events) \* J-32-17s-28e \* Eddy County, New Mexico  
NMOCD Tracking Numbers: Release 1 of 2: 30-015-01655 \* **2RP-834** \* Date of release: 6/27/11  
Release 2 of 2: 30-015-01656 \* **2RP-1069** \* Date of release: 3/15/12

James,

Your proposal for remediation of the above referenced releases is approved. It is OCD's understanding that the second release was basically in the same area as the first release, and remedial actions will address both release events. Please advise in the event proposed excavation depths are not achieved. Contaminated material left in place until facility is closed will require leaving an open violation on the facility, and will appear on OCD Online Well Search as such.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

**Subject:** Alamon Permian State 32 Tank Battery FInal Work Plan

Mr. Bratcher,

Please find attached a copy of the final work plan for the Alamo Permian Resources State 32 tank battery. The hard copy is in the mail headed to your office. We will notify you of the scheduled start date once approved, and we will keep you informed during all phases of the remediation. If you have any questions or concerns please feel free to contact me.

Regards,  
James F. Kennedy
