If a Watercourse was Impacted, Describe Fully.* N/A		

NM OIL CONSERVATION
ARTESIA DISTRICT
DEC 10 2015
RECEIVED

Describe Cause of Problem and Remedial Action Taken.*
One inch buried injection line from waterflood to injection well ruptured. Operator was on site when pipe ruptured and the pump at the water station was immediately turned off. The line was repaired and well was returned to injection.

Describe Area Affected and Cleanup Action Taken.*
Shallow berms were dug in order to contain the release on the location therefore the produced water did not leave the well pad. A vac truck was used to collect the produced water and 35 bbls were recovered. Remediation will begin as per BLM & OCD standards once remediation plan has been approved.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
