Latitude 32.005124 Longitude -103.94721

## NATURE OF RELEASE

Type of Release	Natural Gas Condensate	Volume of Release	9 bbl	Volume Recovered	0 bbl
Source of Release	Low Pressure Gathering Line	Date and Hour of Occurrence	11/13/15	Date and Hour of Discovery	11/13/15 @ 17:12
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required				
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No				
If YES, Volume Impacting the Watercourse.					

If a Watercourse was Impacted, Describe Fully.\*

N/A

Describe Cause of Problem and Remedial Action Taken.\*

Overpressure of the Legacy LP gathering line to the Stateline Compressor Station caused the line to split along a seam, releasing approximately 9 bbl of condensate onto ground surface.

Describe Area Affected and Cleanup Action Taken.\*

Fluids were released onto a pipeline riser pad between two caliche roads. The system was shut in to control the release, and the line was repaired. Impacted soil will be remediated in-situ using high nitrogen fertilizer to ensure COC concentrations are below regulatory limits.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
