Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse N/A
---	---

If a Watercourse was Impacted, Describe Fully.\* N/A

**Describe Cause of Problem and Remedial Action Taken.\***  
Pressure on casing built up and caused a 7.75 bbl produced water release. Well was immediately shut in to prevent further release. The casing will be looked at to see what caused it to pressure up.

**Describe Area Affected and Cleanup Action Taken.\***  
7.75 bbls produced water was released into lined containment on the south, southeast side of facility. .75 bbls of the produced water released overflowed from the corner of the containment. The produced water that overflowed from the containment flowed in a southern direction affecting an area approximately 15'x4'. All released produced water remained on location. 7 bbls produced water were recovered via vacuum truck from lined containment. Liner was checked for holes and no holes were found. Devon will contact someone to remove and dispose of the affected soil.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
