If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

An injection line leak caused 50 bbls of produced water to leak onto the ground. No fluids were recovered and the line was repaired.

Describe Area Affected and Cleanup Action Taken.*

The area affected is approximately 12' x 60'. Remediation was completed in accordance with the remediation plan approved by Geoffrey Leking of NMOCD via email on 01/18/2013 and approved by James Amos of the BLM via email on 01/24/2013.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of liability under federal, state, or local laws and/or regulations.

RE: EVA E. BLINEBRY #19

Enclosed are the results of analyses for samples received by the laboratory on 11/20/12 9:55.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-11-3. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

Subject: Oxy-Eva Blinebry Federal #19-Remediation Plan

Geoff,

This message is to confirm our discussion on January 14, 2013 concerning the remediation plan for the Oxy Eva Blinebry Federal #19 site. I have attached the site diagram and lab data summary table that we used in our discussion. As you recall, we decided to use the 2' steel line that runs through the middle of the leak area as a divider and each half will be excavated to the depths agreed upon as follows. As mutually agreed, Oxy will excavate to a depth of 5 feet in the area of SP1 then place a compacted clay liner in the bottom of the excavation. In the area of SP2 and SP3, the excavation will be 2.5 feet. The excavations will then be backfilled with clean soil.

If you would please reply back via e-mail with your concurrence to this plan, it would be greatly appreciated.

Thanks, Cliff

Cliff, as per our meeting the other day, you are okay to proceed as per plan. Let me know when you are starting and prior to backfill. Also, I'm no seeing a copy of the C-141, could you shoot me a copy. thanks

On Wed, Jan 23, 2013 at 7:01 PM, Cliff P. Brunson <cbrunson@bbcinternational.com> wrote:
Jim,

I have attached a remediation packet of information for your review. This is the same information that was presented in our meeting on January 22, 2013. The packet includes a site diagram, groundwater information, and original laboratory data. As we discussed, we decided to use the 2' steel line that runs through the middle of the leak area as a divider and each half will be excavated to the depths agreed upon as follows. As mutually agreed, Oxy will excavate to a depth of 5 feet in the area of SP1 then place a compacted clay liner in the bottom of the excavation. In the area of SP2 and SP3, the excavation will be 2.5 feet. The excavations will then be backfilled with clean soil. Any pasture areas affected and/or disturbed will be re-seeded with the appropriate BLM seed mixture as well.

Oxy is therefore requesting the approval of the BLM to proceed with the submitted remediation plan. If you would please respond back via e-mail with your approval, it would be greatly appreciated. If you have any questions, please let us know.

Thanks, Cliff
