Describe Cause of Problem and Remedial Action Taken.*

Hole in oil tank due to corrosion released 200 BBLS of crude oil into the containment area. Vacuum trucks were used to recover the crude oil.

Describe Area Affected and Cleanup Action Taken.*

70 BBLS of crude oil was recovered. Vacuum trucks were used to recover the crude oil. The site was investigated and a remediation kplan was submitted and approved by M. Bratcher of the NMOCD on July 29, 2011. The site was excavated and backfilled in August 2011 per the approved plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
