Attention: Mr. Shawn Turk

Re: 4th Amendment to NMOCD Order PLC-373
Lybrook Trunk Line #1 Gathering System
Please see attached list of 34 Wells
Lybrook Gallup (oil) Pool (42289)
Wildcat Gallup Pool (97981)
Counselors Gallup-Dakota Pool (13379)
Basin Mancos Gas Pool (91232)
Sandoval County, New Mexico

PLC-373-B

RECEIVED OCD
2015 JUL 17 P. 3:02

Dear Mr. Turk:

We are in receipt of your application of May 15, 2014 requesting a 4th amendment to NMOCD Order PLC-373-C/OLM-82-B in Sandoval County, New Mexico to add 34 wells to the Lybrook Trunk #1 Gathering System.

Since it appears that all the New Mexico Oil Conservation Division's rules and regulations have been complied with, and there will be no loss of revenue to the State of New Mexico as a result of your proposed operation, your request is hereby approved. Our approval is subject to like approval by the New Mexico Oil Conservation Division. Please submit a copy of the NMOCD's approval to this office.

Our approval does not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

Please submit your filing-fee in the amount of \$30.00 dollars. When you provide a check as payment, you authorize the State of New Mexico to either use information from your check to make a one-time electronic fund transfer from your account or to process the payment as a check transaction.

If you have any questions, or if we may be of further help, please contact Pete Martinez at (505) 827-5791.

Very truly yours,

AUBREY DUNN
COMMISSIONER OF PUBLIC LANDS

EXPLAN/AT
Please note: due to a Traditional Cultural Property, the Lybrook B14-2206 01H and 02H wells were cancelled. Encana requested these wells be removed from the Lybrook Gathering
To date, Encana has nineteen (19) horizontal wells producing from the Lybrook Gallup Pool, two (2) horizontal wells producing from the Wildcat Gallup Pool, eleven (11) horizontal v producing wells were targeted and completed in a correlative interval within the Mancos Formation. Completion design was very similar for all thirty-four (34) wells. Initial flowback . Lybrook Gallup Pool and the Basin Mancos Gas Pool, nine (9) horizontal wells that will produce from the Lybrook Gallup Pool, seventeen (17) horizontal wells that will produce from: also be targeted and completed in the same interval within the Mancos formation.
Projected decline rates for all wells listed above: Di/b:75%/1.8.
*BTU value is lower over the 1st ~6 months due to pumping nitrogen while completing the well. Nitrogen introduced while completing decreases over time as the well is produced.
