Dear Mr. Bratcher,

Talon/LPE is sending the analytical test results for soil samples collected at the Cimarex Energy Co. Red Lake Disposal line release. Please review the analytical test results, Cimarex Energy Co. is requesting approval to place a 20 Mil. liner into the bottom of the excavated area and to proceed with backfilling the excavated area back to ground level using new soil transported to the location. Please contact me if further information is required.

The release occurred on a pipeline right of way, the incident is probably not attached to an API number.
