Subject: Geronimo Battery C-141

Lisa,

NMOCD is in receipt of an Initial C-141 reporting a produced water release at SM Energy's Geronimo Battery. Date of release is reported as 3/31/16. The C-141 state "The affected soil inside the battery will be blended with fresh soil." Please be advised that at this time, this method is not approved. OCD will require a vertical and horizontal delineation of the affected area, and a plan for remediation then submitted for review, based on analytical data, and OCD rules and guidelines.

If you have any questions or concerns, please contact me.
