Subject: Confirmation Samples on the Todd 26 F SWD & Todd 15 B Federal #2

Jennifer per our discussion today. Sheldon will be pulling confirmation samples at the above referenced sites. He will place flags at the sample points.

Regarding the Todd 26 F SWD, as we discussed, further delineation at S-2 is not feasible at this time due to the pre-existing electrical layout for the SWD. Sheldon will be available to meet with you or Jeffery on 9/4/13 on location at your convenience to discuss further actions.

Thank you.

Respectfully,

Kimberly M. Wilson

Kimberly,

I have something that I have to take care of at 9 am. I will be able to go out right after. I visited with Jim Amos and he said that the contaminants will need to be cleaned up. Devon will need to find the wiring and flag it appropriately, so the work can be completed. I will still go out to look at the Todd locations. Have Sheldon give me a call, or you can send me his number, and I will contact him when I am on my way out.
