I. This proposed horizontal gas well (TVD = 11,934' & MD = 16,515') is on BLM surface and 1,920 acre BLM exploratory unit agreement NMNM-125386X. Portions of the well bore will be non-standard (too far south, west, and north) for the Red Hills; Wolfcamp, West (Gas) Pool (83610) due to land uses (pipelines, power line, and road) and the need for more length and efficient spacing that will prevent waste.

The well bore is all within the W2W2 9-26s-32e and all within the Red Hills West Unit (Exhibit A). The first and last take points (Exhibit B) are 330' from the 320 acre dedication boundary (Exhibit C), instead of the standard  $\geq 660'$  for a gas well.

Mewbourne Oil Company requests a non-standard location and non-standard proration unit due to land uses and the need for more length and efficient spacing that will prevent waste. Producing this well from the requested interval will prevent waste and recover additional reserves. The proposed perforated gas well bore will be 673' (17%) longer than a standard perforated gas well bore.

Encroachment to the west is toward the interior of the Red Hills West Unit. Closest perforation to the Unit boundary to the west is 5610'. Closest perforation to the Unit boundary to the east is 7240'. Encroachments to the north and south are toward the exterior of the Red Hills West Unit.

The perforated interval of a standard Wolfcamp gas well must be  $\geq 660'$  from the boundary of its 320 acre dedication. In this case, the south 330' perforations and north 330' perforations will be outside the drilling window boundary. The BHL will also be too far west. However, that is toward the interior of the Red Hills West Unit.

II. Two Forms C-102 showing the well, dedication, and take points are attached as Exhibits B and C.

III. Red Hills West Unit boundaries are shown on Exhibit A. The well encroaches to the north, west, and south. Encroachment to the west is towards the interior of the Unit. Closest Red Hills; Wolfcamp (Gas) dedication is in 1-26-32e. No Wolfcamp (gas or oil) dedications (Exhibit D) currently border or corner the proposed dedication. This information is current and correct.

IV. Archaeology is not an issue.

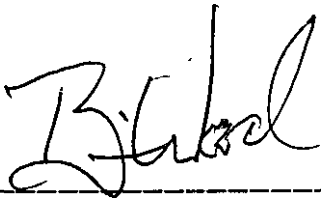

V. Land uses (1 road, 1 overhead 3-phase power line, 1 buried gas line, 1 buried water line, and 4 poly surface pipelines would need to be relocated if a 340' x 340' well pad were staked at 660 FSL & 660 FWL), geology, and the need to prevent waste and recover additional reserves drive the need for this nonstandard location. Exhibit E shows some of these existing facilities.

VI. Mewbourne Oil Company does not believe drilling to a standard location is cost effective for this well.

VII. I hereby attest that I, on or before the date that the application was submitted to the division, sent notification to the affected persons by certified mail, return receipt requested, advising them that if they have an objection it must be filed in writing within 20 days from the date NMOCDC receives the application. These affected persons have working or royalty interests in lands (EXHIBIT F) that border the 320-acre spacing unit. Said notice (EXHIBIT G) was sent to:
