Hello again everyone,

There was another release from the Legg Federal Battery on June 9<sup>th</sup>. A gasket on a test heater failed and misted fluids upward and out onto the location. Most of the pooling took place within the bermed area. This also occurred mostly over the same area that was impacted by the recent leak that happened on June 3<sup>rd</sup> for which I submitted the C-141 earlier today. Please find the attached initial form for the new leak and please call me with any questions. Thank you...
