Mike and Jennifer,

Sorry for the late notification, Tetra Tech is preparing to install and Temporary Well on the above referenced site. We will be onsite on Tuesday (9-3-13) to install the well. We plan to install the temporary well approximately 120-130' bgs or until groundwater is encountered. If no groundwater is encountered during drilling we will wait at least 48 hours before we gauge the well. Tetra Tech will also notify you prior to the gauging in case you would like to be present. After groundwater depth is established the well will be plugged. We will call if the schedule changes or have any delays on the project.

Let me know if you need additional information.

Thanks,

Tom Elliott | Project Manager / Environmental Scientist

Okay thanks. I won't be able to make it, but go ahead and proceed. I will be in the office on Wednesday if you need anything, or you can send me an email. I will still check my email throughout the day.
