NATURE OF RELEASE

Type of Release	Produced oil, water - firemen's foam and water	Volume of Release	110 bbls	Volume Recovered	75 bbls
Source of Release	Lightening strike resulting in tank fire.	Date and Hour of Occurrence	3:30 PM	Date and Hour of Discovery	4/11/09
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Mark Whitaker		
By Whom?	Gary James	Date and Hour	4-11-09 evening		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

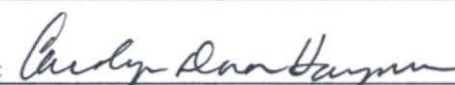

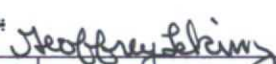

Describe Cause of Problem and Remedial Action Taken.*

Lightening strike resulted in fire at tank battery. Oil tank and gun barrel vessel involved. Estimated 50 bbls oil burned, 30 oil released and recovered from berm. 45 bbls water from gun barrel was released into berm and recovered. Berm surrounding tanks contained the produced fluids released. Water and foam from firefighting effort spread a film of oil to outside of the berm. All wells were shut in and will remain shut in until a temporary facility is set. Oil remaining in the collapsed tank and the intact tank has been secured in a temporary tank.

Describe Area Affected and Cleanup Action Taken.*

Drawing and photos are attached. Area affected outside the berm is approximately 34 x 80'. Oily soils were scraped-up and restored with clean caliche material purchased from the landowner. 140 cubic yards of oily dirt was taken to Sundance Disposal. Clay was compacted 1' BGS where the new facility is set. New gun barrel and holding tank has been set. The berm is reconstructed. Ground water is 90-100' BGS at this location (Will Cary monitor wells water levels). Attached are lab results. TPH < 1000 mg/kg and Chloride < 250mg/kg. This site remains an active production facility and will be appropriately abandoned at the end of production.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
