Re: Application for a Non-Standard Location Thistle Unit 96H E/2 E/2 Section 22 and E/2 NE/4 Section 27-T23S-R33E Lea County, New Mexico

Gentlemen:

Devon Energy Production Company, L.P. ("Devon") plans to drill the referenced horizontal well to an approximate total vertical depth of 9,825' and an approximate total measured depth of 17,141' in order to test the Bone Spring formation. As reflected on the attached C-102, the well has been permitted at a surface location of 250' FNL & 300' FEL Section 22-T23S-R33E with a permitted bottom hole location of 2,590' FNL & 350' FEL of Section 27-T23S-R33E. The projected upper perf is expected to be approximately 330' FNL & 348' FEL Section 22-T23S-R33E and the projected lower perf is expected to be approximately 2,590' FNL & 350' FEL Section 27-T23S-R33E. The reason behind permitting this well at an unorthodox location is to maximize recovery.

In accordance with Division rules, Devon respectfully requests that the Commission administratively approve the enclosed application for an unorthodox location with respect to that portion of the horizontal wellbore as described in the above paragraph.

Please note the well is located within the boundary of the Thistle Unit in which Devon is the operator. Enclosed for your convenience is a plat showing the Thistle Unit boundary. Cimarex Energy Co. is operator of the wells in Section 26-T23S-R33E. Notification of this application is being sent via certified mail to Cimarex Energy Co. of Colorado.

Enclosed are the following documents:

- 1. Form C-102
- 2. Land Plat
- 3. Administrative Application Checklist

If you have any questions concerning this application, please contact the undersigned at (405) 552-6160.

Sincerely,

DEVON ENERGY PRODUCTION COMPANY, L.P.
