Bob,

Based on the analytical data presented, your request to backfill the excavation in the upper branch of the draw is approved. Approval is contingent on like approval by BLM as may be applicable.

**Subject:** Dagger Draw Gas System

Mike,

Per our discussion this morning, Yates Petroleum Corporation is requesting permission to backfill the excavation within the draw area. I will be submitting a Final C-141 to your attention and YPC will continue to remediate the pasture area to the north and south of the release point (rip, fertilizer applied and watered) for approximately the next 60 days on the private surface per the owner's request.

Thank you for your assistance in this matter.
