NATURE OF RELEASE

Type of Release: Produced water, oil and condensate	Volume of Release: unknown	Volume Recovered: none
Source of Release: Former drilling reserve pit, compressor, BGT	Date and Hour of Occurrence: unknown	Date and Hour of Discovery: March 30, 2016
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom? Steve Moskal	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* The site has had known impacts for several years. It has been identified that both BP and Williams Field Services are liable for remedial action. The OCD District III office issued a compliance requirement on October 6, 2015 stating BP is responsible to perform the following:

- Within 30 days BP will remediate both horizontally and vertically the area near TH-4, 5, 8, 9, 10, 11 and the area north of Williams line in the vicinity of SV-41
- Within 45 days BP will Plug and Abandon MW-3 following NMED plugging guidelines if needed.
- If it is determined that BP's operations impacted groundwater, BP will be required to submit a Draft Ground Water Remediation plan within 45 days of discovery.

Extensions may be granted to either BP or Williams concerning the onsite remediation 's as long as the following conditions are met:

- Remediation begins prior to the required timeframe.
- The extensions only allow for continuous on-site remediation.
- The extension request is made to the District prior to the lapse of the required timeframe.

Describe Area Affected and Cleanup Action Taken.\* To date, BP has begun remediation via removing all surface equipment and subsurface lines, provided an access agreement for MW-3 to Williams Filed Services and initiated vertical and horizontal remedial activities at the location. At this time BP requests an extension based on the criteria listed above. BP has fulfilled each of the requirements in order to file this extension and anticipates continuing remedial activities starting the week of January 1, 2017 with continued excavation and delineation. This is the third request for extension as a previous was submitted on December 2, 2016. BP will communicate closely with the OCD District III office during the progression of the project in order to ensure compliance of the requirements.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Re: Extension Request**

**Well: Florance Gas Com J #16A, 30-045-21790, Section 6, Township 30N, Range 9W**

Mr. Moskal,

The Oil Conservation Division (OCD) has reviewed the BP America Production Company (BP) extension request received on December 30, 2016. Below are the OCD conditions of approval.

- BP will be granted a 30-day extension to complete remediation as outlined in the October 6, 2016 letter, so long as the remediation is continuous.
- As needed should BP have to suspend remediation's efforts due to site access and safety concerns during simultaneous operations. BP will provide notification to the OCD verbally, and in writing prior to stopping remediation. The written notification will detail why the remediation efforts need to be suspended, and provide the OCD a time frame when remediation will recommence.

Additional extensions may be granted to BP concerning the onsite remediation so long as the following conditions are met;

- Remediation is continuous or BP has been approved to suspend remediation efforts temporarily.
- The extensions only allow for continuous on-site remediation.
- The extension request is made to the District prior to the lapse of the required timeframe.

If you have additional questions, please feel free to call me at 505-334-6178 Ext. 115.

Sincerely,

Cory Smith
